- Bass Reflex Speaker System delivers a powerful, deeper bass

Easy to use

- Auto sync time via iPod/iPhone dock with Lightning connector
- Audio-in for easy portable music playback
- Time and alarm backup for on-time wakeup even with power cut

Start the day your way

- Dual alarm to wake you and your partner at different times
- Weekday/ weekend alarm setting to complement your lifestyle

PHILIPS

Highlights

Bluetooth music streaming

Listen to all your favorite songs on a speaker that delivers fabulous sound. This Philips docking speaker plays music from your Android powered devices via Bluetooth. Simply download the free Philips DockStudio app and the Bluetooth will automatically be turned on and connect once when your device is docked. You get to enjoy powerful and outstanding sound, with unbeatable convenience. Hardly anything else sounds as good.

Play and charge via Lightning

Enjoy your favorite music while charging your iPod/iPhone/iPad via the new Lightning connector! Just dock it directly on the speaker to play your hand-picked tunes in superb sound. It also charges your device quickly while playing, so you don't have to worry about the battery running out.

Auto sync time

Auto sync time via iPod/iPhone dock with Lightning connector

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

Time and alarm backup

When there is a power failure, this intelligent clock will still maintain and keep its reliable time and your settings. The scheduled alarm remains active even when its display is off - all thanks to a pre-installed battery. When the power comes back on, there is no need to adjust the clock or reinstate settings. More amazingly, even if power supply is not restored, the battery provides enough energy for the buzzer to go off at the alarm time you have set - making sure you never wake up late.

Weekday/ weekend alarm

Designed with modern day lifestyles in mind, this clock radio has a dual alarm feature, allowing you to set different alarm times for weekdays and weekends or even vary the alarm settings for couples. The alarm settings can be tailored for the same alarm times for the entire week from Monday to Sunday. Or you can set the alarm for an early start on weekdays from Monday to Friday, and lazy lie-ins for Saturday and Sundays. Whichever you choose, this convenient features saves you from the hassle of fiddling with different alarm times every single night.

Docking station with Bluetooth®
Bluetooth Lightning connector, DAB+, for iPod/iPhone/iPad

Specifications

iPhone compatibility

- via Bluetooth: iPhone 5, iPhone 4S, iPhone 4, iPhone 3GS, iPhone 3G
- via Lightning connector: iPhone 5
