We were thinking of you when we made this product.
Welcome to the world of Electrolux

Thank you for choosing a first class product from Electrolux, which hopefully will provide you with lots of pleasure in the future. The Electrolux ambition is to offer a wide variety of quality products that make your life more comfortable. You find some examples on the cover in this manual. Please take a few minutes to study this manual so that you can take advantage of the benefits of your new machine. We promise that it will provide a superior User Experience delivering Ease-of-Mind. Good luck!
The symbols you will see on some paragraphs of this booklet have the following meaning:

⚠️ The warning triangle and/or the key words (Warning!, Caution!) emphasize information that is particularly important for your safety or correct functioning of the appliance.

ℹ️ The information marked with this symbol provides additional instructions and practical tips on the use of the appliance.

🌺 Tips and information about economical and ecological use of the machine are marked with this symbol.

Our contribution to the protection of the environment: we use environmentally friendly paper.

Safety Information

In the interest of your safety and to ensure the correct use, before installing and first using the appliance, read this user manual carefully, including its hints and warnings. To avoid unnecessary mistakes and accidents, it is important to ensure that all people using the appliance are thoroughly familiar with its operation and safety features. Save these instructions and make sure that they remain with the appliance if it is moved or sold, so that everyone using it through its life will be properly informed on appliance use and safety.

General safety

- It is dangerous to alter the specifications or attempt to modify this product in any way.
- During high temperature wash programmes the door glass may get hot. Do not touch it!
- Make sure that small pets do not climb into the drum. To avoid this, please check inside the drum before use.
- Any objects such as coins, safety pins, nails, screws, stones or any other hard, sharp material can cause extensive damage and must not be placed into the machine.
- Only use the advised quantities of fabric softener and detergent. Damage to the fabric can result if using excessive amounts. Refer to the manufacturer's recommendations for quantity guild lines.
- Wash small items such as socks, laces, washable belts etc in a washing bag or pillow case as it is possible for such items to slip down between the tub and the inner drum.
- Do not use your washing machine to wash articles with whalebones, material without hems or torn material.
- Always unplug the appliance and turn off the water supply after use, clean and maintenance.
- Under no circumstances should you attempt to repair the machine yourself. Repairs carried out by inexperienced persons may cause injury or serious malfunctioning. Contact your local Service Centre. Always insist on genuine spare parts.

Installation

- This appliance is heavy. Care should be taken when moving it.
- When unpacking the appliance, check that it is not damaged. If in doubt, do not use it and contact the Service Centre.
- All packing and transit bolts must be removed before use. Serious damage can occur to the product and to property if this is not adhered to. See relevant section in the user manual.
- After having installed the appliance, check that it is not standing on the inlet and drain hose and the worktop is not pressing the electrical supply cable.
- If the machine is situated on a carpeted floor, please adjust the feet in order to allow air to circulate freely.
- Always be sure, that there is no water leakage from hoses and their connections after the installation.
If the appliance is installed in a location subject to frost, please read the “dangers of freezing” chapter.

Any plumbing work required to install this appliance should be carried out by a qualified plumber or competent person.

Any electrical work required to install this appliance should be carried out by a qualified electrician or competent person.

Use

This appliance is intended to be used in household and similar applications such as:
- Farm Houses.
- By clients in serviced apartments, holiday apartments and other residential type environments.

Only wash fabrics which are designed to be machine washed. Follow the instructions on each garment label.

Do not overload the appliance. See the relevant section in the user manual.

Before washing, ensure that all pockets are empty and buttons and zips are fastened. Avoid washing frayed or torn articles and treat stains such as paint, ink, rust, and grass before washing. Underwired bras must NOT be machine washed.

Garments which have been in contact with volatile petroleum products should not be machine washed. If volatile cleaning fluids are used, care should be taken to ensure that the fluid is removed from the garment before placing in the machine.

Never pull the power supply cable to remove the plug from the socket; always take hold of the plug itself.

Never use the washing machine if the power supply cable, the control panel, the working surface or the base are damaged so that the inside of the washing machine is accessible.

Child safety

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

The packaging components (e.g. plastic film, polystyrene) can be dangerous to children - danger of suffocation! Keep them out of children’s reach.

Keep all detergents in a safe place out of children’s reach.

Make sure that children or pets do not climb into the drum. To avoid this, the machine incorporates a special feature. To activate this device, rotate the button (without pressing it) inside the door clockwise until the groove is horizontal. If necessary, use a coin.

To disable this device and restore the possibility of closing the door, rotate the button anti-clockwise until the groove is vertical.
Product description

Your new Electrolux Time Manager with the Lifestyle Wash System delivers a host of special features to assist you in the laundry:

- Time Manager gives you the opportunity to program the washing machine not only by fabric or temperature but also by TIME, giving you the flexibility to adjust the washing time to suit the time you have available.
- The jetsystem™ spray action allows the water level to be much lower – and gets water and detergent more effectively to all the wash.
- Specially developed programs like “Sport Intensive”, “Delicates Plus” and “Jeans” give you options for your washing that you can really use.

1. Detergent dispenser drawer
2. Control panel
3. Door opening handle
4. Drain pump
5. Adjustable feet

Detergent dispenser drawer

- Prewash
- Wash
- Fabric Softener
Control panel

1. Programme selector dial
2. Temperature button
3. Spin reduction button
4. Prewash button
5. Extra Rinse button
6. Delay Start button
7. Display
8. Start/Pause button
9. “Time Manager” button
Use

First Use

- Ensure that the electrical and water connections comply with the installation instructions.

Daily Use

Acoustic signals
The machine is provided with an acoustic device, which sounds in the following cases:
- when selecting a wash programme
- when depressing the options buttons
- at the end of the cycle
- in the event of operating problems

By pressing the “Prewash” and “Extra rinse” buttons simultaneously for about 6 seconds, the acoustic signal is deactivated (except for the events of operating problems).

By pressing these 2 buttons again, the acoustic signal is reactivated.

Load the laundry
Open the door by carefully pulling the door handle outwards. Place the laundry in the drum, one item at a time, shaking them out as much as possible. Close the door.

Measure out the detergent and the fabric softener
Pull out the dispenser drawer until it stops. Measure out the amount of detergent required, pour it into the main wash compartment [Ⅲ] and, if you wish to carry out the “prewash” phase, pour it into the compartment marked [Ⅰ].

If required, pour fabric softener into the compartment marked [Ⅳ] (the amount used must not exceed the “MAX” mark in the drawer). Close the drawer gently.
Select the required programme
Turn the programme selector dial to the required programme.
The Start/Pause light starts to flash and the Display shows the duration of the selected programme.

The selector dial is divided into following sections:

- Cottons 🌼, Synthetics △, Delicates ✿
- Easy Iron ◊, Jeans 🍳
- Spin ◔, Drain ◎, Rinse ◎
- Delicates Plus ✿+, Silk ✿, Hand Wash 🌿, Woollens 🌿
  Sport Intensive 🌈, Cottons Eco 🌼

The selector dial can be turned either clockwise or anticlockwise. Position ◊ to Reset programme/ Switching OFF of the machine.

At the end of the programme the selector dial must be turned to position ◊, to switch the machine off.

Attention!
If you turn the programme selector dial to another programme when the machine is working, the red Start/Pause pilot light will flash 3 times and the message Err will appear on the display to indicate a wrong selection. The machine will not perform the new selected programme.

Programme Option buttons
Depending on the programme, different functions can be combined. These must be selected after choosing the desired programme and before depressing the Start/Pause button.
When these buttons are pressed, the corresponding pilot lights come on. When they are pressed again, the pilot lights go out.

Select the temperature

- 90º
- 60º
- 40º
- 30º

Press this button repeatedly to increase or decrease the temperature, if you want your laundry to be washed at a temperature different from the one proposed by the washing machine.

Maximum temperature are:

- 90ºC for Cottons 🌼 and Cottons Eco 🌼;
- 60ºC for Synthetics △, Easy Iron ◊ and Jeans 🍳;
- 40ºC for Delicates ✿, Delicates Plus ✿+, Sport Intensive 🌈, Woollens 🌿 and Hand Wash 🌿;
- 30ºC for Silk 🌿.

Select the Spin Speed or Night Cycle or Rinse Hold option

- 1000
- 700
- 600
- 🌿
- 🌿

Spin
Press the Spin button repeatedly to change the spin speed, if you want your laundry to be spun at a speed different from the one proposed by the washing machine.

The relevant light will light up.

Maximum speeds are:
- for Cottons 🌼, Cottons Eco 🌼, Jeans 🤖, Spin ✿, Rinse ✿: 1000 rpm;

Night Cycle 🌙: by selecting this option, the machine will not drain the water of the last rinse, so as not to wrinkle the laundry.

As all spinning phases are suppressed, this washing cycle is very quite and can be selected at night or other appropriate times. (NOT available for Easy Iron ✶ and Spin ✿ programmes.)

When the programme has finished, the display shows a 0.00 flashing, the pilot light ← (Door) is on, the Start/Pause light is off and the door is locked to indicate that the water must be emptied out.

Rinse Hold ⬇️: by selecting this option the water of the last rinse is not emptied out to prevent the fabrics from creasing. When the programme has finished the display shows a 0.00 flashing, the pilot light ← (Door) is on, the Start/Pause light is off and the door is locked to indicate that the water must be emptied out.

To empty out the water, please read the previous option steps.

Select the Prewash △ option

Select this option if you wish your laundry to be prewashed before the main wash (not available for woollens, hand wash, delicates plus, silk and sport intensive). The prewash ends with a short spin in programmes for cotton and synthetic fabrics, whereas in the programmes for delicate fabrics the water is only drained.

The relevant pilot light will light up.

To empty out the water:
- turn the programme selector dial to “0”
- select the ⚫ (Drain), ✿ (Spin) programme
- reduce the spin speed if needed, by means of the relevant button
- depress Start/Pause button
- at the end of the programme, the display shows a 0.00 flashing.
Select the Extra Rinse option

![Extra Rinse icon]

This option can be selected with all programmes except the woolens, jeans, delicates plus, silk and hand wash programmes. The machine performs some additional rinses. This option is recommended for people who are allergic to detergents, and in areas where the water is very soft.

Select the Delay start

![Delay icon]

Before you start the programme,

This option makes it possible to delay the starting of the washing programme by 30 min - 60 min - 90 min, 2 hours and then by 1 hour till 20 hours.

The selected delay time value (up to 20 hours) will appear on the display for about 3 seconds, then the duration of the programme will appear again.

The above options must be selected after choosing the wash program with the dial, and before pressing the Start/Pause button.

If after having set the delay start option (and pressed Start/Pause button) and you wish to cancel it, follow the below steps:

1. set the washing machine to PAUSE by pressing the Start/Pause button;
2. deselect the Delay start option, changing the status;
3. press the Start/Pause button to start the program.

Important!
The selected delay can be changed only after selecting the washing program again.
The door will be locked throughout the timed delay.
If you need to open the door, you must first set the washing machine to PAUSE by pressing the Start/Pause button.
After you have closed the door, press the Start/Pause button again.
The Delay Start cannot be selected with DRAIN programme.

Display

![Display icon]

The display shows the following information:

Duration of the selected programme

After selecting a programme, the duration is displayed in hours and minutes (for example 2.05).
The duration is calculated automatically on the basis of the maximum recommended load for each type of fabric.

After the programme has started, the time remaining is updated every minute.
**Washing programme phase icons**

By selecting the wash programme, the washing programme phase icons corresponding to the various phases making up the programme are shown in the bottom of the display.

After the machine has started, only the running icon stays on. When the programme has finished, a flashing zero (0.00) is displayed.

**Delayed start**

The selected delay (20 hours max) set by means of the relevant button appears on the display for about 3 seconds, then the duration of the previously selected programme is displayed. The delay time value decreases by one unit every hour and then, when 1 hour remain, the time decreases every minute.

**Incorrect option selection**

If an option which is not compatible with the set wash programme is selected, the message **Err** is displayed for about 2 seconds and the integrated red Start/Pause light start flashing.

**Alarm codes**

In the event of operating problems, some alarm codes can be displayed, for example **E20** (see paragraph “Something not working”).

**End of programme**

When the programme has finished a flashing zero is displayed, the “**door**” ←0 pilot light goes off and the door can be opened.

**Select the Start/Pause**

To start the selected programme, press the “**Start/Pause**” button; the green pilot light stops flashing. The “**door**” ←0 pilot light illuminates to indicate that the appliance starts operating and the door is locked.
The **door** →0 pilot light indicates if the door can be opened:
- light on: the door cannot be opened. The appliance is running.
- light off: the door can be opened. The washing programme is finished.

To interrupt a programme which is running, depress the **“Start/Pause”** button: the green pilot light starts to flash.

To restart the programme from the point at which it was interrupted, press the **“Start/Pause”** button again.

If you have chosen a delayed start, the machine will begin the countdown.

If an incorrect option is selected, an integrated red pilot light of the **“Start/Pause”** button flashes 3 times and the message **Err** is displayed for about 2 seconds. Three acoustic signals sound.

### Soil Level

<table>
<thead>

</tr>
<tr>
<td>Super Refresh</td>
<td>🦅</td>
<td>For refreshing a very few items only</td>
</tr>
</tbody>
</table>

1) We recommend you to reduce the load sizes (see Washing programmes table).

### Select the “Time Manager” option

This function allows you to modify the washing time, automatically proposed by the washing machine.

By pressing the **“Time Manager”** 🕒 button repeatedly, the duration of the washing cycle can be increased or decreased.
**Child Lock**

The “Child Lock” feature will allow you to lock the controls while the machine is running to prevent tampering. To activate “Child Lock” the machine must be running. e.g., Programme must be selected and the programme started by pressing the “Start/Pause” button.

Activate “Child Lock” by pressing the “Extra Rinse” and “Delay” buttons simultaneously for 6 seconds until the padlock symbol  is displayed on the screen.

To de-active “Child Lock” simply press the “Extra Rinse” and “Delay” buttons simultaneously until the padlock symbol  in the screen disappears.

“Child Lock” will remain activated until you de-activate it, even if the machine is turned off.

**Cancelling a programme**

Turn the selector dial to “0” to cancel a programme which is running. Now you can select a new programme.

**Opening the door after the programme has started**

First set the machine to pause by pressing the “Start/Pause” button.

If the “door” icon disappears on the display, the door can be opened.

If the “door” light does not go off, this means that the machine is already heating, that the water level is above the bottom edge of the door or that the drum is turning.

In this case the door cannot be opened.

If you cannot open the door but you need to open it you have to switch the machine off by turning the selector dial to “0”. After about 3 minutes the door can be opened (pay attention to the water level and temperature!).

**At the end of the programme**

The machine stops automatically.

If the “Rinse Hold”  or Night Cycle  options have been selected, the “door”  light illuminates, a flashing “0.00” will appear on the display, the “Start/Pause” light go off and the door remains locked to indicate that the water must be emptied out before opening the door.

**To empty out the water please read the steps on the Night Cycle option paragraph.**

Turn the programme selector dial to “0” to switch the machine off.

Remove the laundry from the drum and carefully check that the drum is empty.

If you do not intend to carry out another wash, close the water tap.

Leave the door open to prevent the formation of mildew and unpleasant smells.

**Altering an option or a running programme**

It is possible to change any option before the programme carries it out. Before you make any change, you must pause the washing machine by pressing the “Start/Pause” button.

Changing a running programme is possible only by resetting it. Turn the programme selector dial to “0” and then to the new programme position.

The washing water in the tub will be not emptied out. Start the new programme by depresssing the “Start/Pause” button again.

**Interrupting a programme**

Depress the “Start/Pause” button to interrupt a programme which is running, the corresponding light starts to flash. Depress the button again to restart the programme.
Washing hints

Sorting the laundry
Follow the wash code symbols on each garment label and the manufacturer’s washing instructions. Sort the laundry as follows: whites, coloureds, synthetics, delicates, woollens.

Temperatures

| 90° | for normally soiled white cottons and linen (e.g. tea cloths, towels, tablecloths, sheets...) |
| 40°/60° | for normally soiled, colour fast garments (e.g. shirts, night dresses, pyjamas...) in linen, cotton or synthetic fibres and for lightly soiled white cotton (e.g. underwear). |
| 30° (cold) | for delicate items (e.g. net curtains), mixed laundry including synthetic fibres and woollens bearing the label “pure new wool, machine washable, non-shrink”. |

Before loading the laundry
Never wash whites and coloureds together. Whites may lose their “whiteness” in the wash.

New coloured items may run in the first wash; they should therefore be washed separately the first time.

Make sure that no metal objects are left in the laundry (e.g. hair clips, safety pins, pins).
Button up pillowcases, close zip fasteners, hooks and poppers. Tie any belts or long tapes.
Remove persistent stains before washing.

Rub particularly soiled areas with a special detergent or detergent paste. Treat curtains with special care. Remove hooks or tie them up in a bag or net.

Maximum loads
Recommended loads are indicated in the programme charts.

General rules:
Cotton, linen: drum full but not too tightly packed;
Synthetics: drum no more than half full;
Delicate fabrics and woollens: drum no more than one third full.

Washing a maximum load makes the most efficient use of water and energy. For heavily soiled laundry, reduce the load size.

Laundry weights
The following weights are indicative:

<table>
<thead>
<tr>

</table>

Removing stains
Stubborn stains may not be removed by just water and detergent. It is therefore advisable to treat them prior to washing.
Blood: treat fresh stains with cold water. For dried stains, soak overnight in water with a special detergent then rub in the soap and water.

Oil based paint: moisten with benzine stain remover, lay the garment on a soft cloth and dab the stain; treat several times.

Dried grease stains: moisten with turpentine, lay the garment on a soft surface and dab the stain with the fingertips and a cotton cloth.

Rust: oxalic acid dissolved in hot water or a rust removing product used cold. Be careful with rust stains which are not recent since the cellulose structure will already have been damaged and the fabric tends to hole.

Mould stains: treat with bleach, rinse well (whites and fast coloureds only).

Grass: soap lightly and treat with bleach (whites and fast coloureds only).

Ball point pen and glue: moisten with acetone (*), lay the garment on a soft cloth and dab the stain.

Lipstick: moisten with acetone as above, then treat stains with methylated spirits. Remove any residual marks from white fabrics with bleach.

Red wine: soak in water and detergent, rinse and treat with acetic or citric acid, then rinse. Treat any residual marks with bleach.

Ink: depending on the type of ink, moisten the fabric first with acetone (*), then with acetic acid; treat any residual marks on white fabrics with bleach and then rinse thoroughly.

Tar stains: first treat with stain remover, methylated spirits or benzine, then rub with detergent paste.

(*) do not use acetone on artificial silk.

Detergents and additives

Good washing results also depend on the choice of detergent and use of the correct quantities to avoid waste and protect the environment. Although biodegradable, detergents contain substances which, in large quantities, can upset the delicate balance of nature.

The choice of detergent will depend on the type of fabric (delicates, woollens, cottons, etc.), the colour, washing temperature and degree of soiling.

Only low suds front load washing detergents should be used in this appliance:

• powder detergents for all types of fabric,
• powder detergents for delicate fabrics (60°C max) and woollens,
• liquid detergents, preferably for low temperature wash programmes (60°C max) for all types of fabric, or special for woollens only.

The detergent and any additives must be placed in the appropriate compartments of the dispenser drawer before starting the wash programme.

The washing machine incorporates a recirculation system which allows an optimal use of the concentrated detergent.

Although not recommended, if you are using liquid front load washing detergent, be sure to only add it to the dispenser marked \[\text{Detergent} \] just before starting the wash program and choose a program without a prewash cycle.

Any fabric softener or starching additives must be poured into the compartment marked \[\text{Softener} \] before starting the wash programme.
Follow the product manufacturer’s recommendations on quantities to use and **do not exceed the «MAX» mark in the detergent dispenser drawer.**

**Quantity of detergent to be used**
The type and quantity of detergent will depend on the type of fabric, load size, degree of soiling and hardness of the water used.

Water hardness is classified in so-called “degrees” of hardness. Information on hardness of the water in your area can be obtained from the relevant water supply company, or from your local authority.

Follow the product manufacturers’ instructions on quantities to use.

Use less detergent if:
- you are washing a small load,
- the laundry is lightly soiled,
- large amounts of foam form during washing
# International wash code symbols

These symbols appear on fabric labels, in order to help you choose the best way to treat your laundry.

*Cottons Eco programme with 60°C option selected is recommended for a full load of normally soiled cottons, and is the water and energy rating label programme (in accordance with AS/NZS 2040:2005 & AS/NZS 6400:2005).*
Care and cleaning

You must DISCONNECT the appliance from the electricity supply, before you can carry out any cleaning or maintenance work.

Descaling
The water we use normally contains lime. It is a good idea to periodically use a water softening powder in the machine. Do this separately from any laundry washing, and according to the softening powder manufacturer’s instructions. This will help to prevent the formation of lime deposits.

After each wash
Leave the door open for a while. This helps to prevent mould and stagnant smells forming inside the appliance. Keeping the door open after a wash will also help to preserve the door seal.

Maintenance Wash
With the use of low temperature washes it is possible to get a build up of residues inside the drum.
We recommend that a maintenance wash be performed on a regular basis.

Cleaning the dispenser drawer
The washing powder and additive dispenser drawer should be cleaned regularly.
Remove the drawer by pressing the catch downwards and by pulling it out. Flush it out under a tap, to remove any traces of accumulated powder.

To aid cleaning, the top part of the additive compartment should be removed.

Cleaning the drawer recess
Having removed the drawer, use a small brush to clean the recess, ensuring that all washing powder residue is removed from the upper and lower part of the recess.
Replace the drawer and run the rinse programme without any clothes in the drum.

External cleaning
Clean the exterior cabinet of the appliance with soap and water only, and then dry thoroughly.
Cleaning the pump

The pump should be inspected if
• the machine does not empty and/or spin
• the machine makes an unusual noise during draining due to objects such as safety pins, coins etc. blocking the pump.

Proceed as follows:
• Disconnect the appliance.
• If necessary wait until the water has cooled down.
• Open the pump door.

• Place a container close to the pump to collect any spillage.
• Pull out the emergency emptying hose, place it in the container and remove its cap.
• When no more water comes out, unscrew the pump cover and remove it. Always keep a rag nearby to dry up spillage of water when removing the cover.

• Remove any objects from the pump impeller by rotating it.

• Put the cap back on the emergency emptying hose and place the latter back in its seat.

• Screw the pump cover fully in.
• Close the pump door.

⚠️ Warning!

When the appliance is in use and depending on the programme selected there can be hot water in the pump.
Never remove the pump cover during a wash cycle, always wait until the appliance has finished the cycle, and is empty. When replacing the cover, ensure it is securely retightened so as to stop leaks and young children being able to remove it.

**Cleaning the water inlet filter**
If your water is very hard or contains traces of lime deposit, the water inlet filter may become clogged.
It is therefore a good idea to clean it from time to time.
Turn off the water tap. Unscrew the water inlet hose. Clean the filter using a hard bristle brush. Tighten up the inlet hose.

![Image of water tap and hose unscrewing](image)

**The dangers of freezing**
If the machine is exposed to temperatures below 0°C, certain precautions should be taken.
- Turn off the water tap.
- Unscrew the inlet hose.
- Place the end of the emergency emptying hose and that of the inlet hose in a bowl placed on the floor and let water drain out.
- Screw the water inlet hose back on and reposition the emergency emptying hose after having put the cap on again.
- When you intend to start the machine up again, make sure that the room temperature is above 0°C.

**Important!**
Every time you drain the water through the emergency emptying hose you must pour 2 litres of water into the main wash compartment of the detergent drawer and then run the drain programme.

**Emergency emptying out**
If the water is not discharged, proceed as follows to empty out the machine:
- pull out the plug from the power socket;
- close the water tap;
- if necessary, wait until the water has cooled down;
- open the pump door;
- place a bowl on the floor and place the end of the emergency emptying hose into the bowl. Remove its cap. The water should drain by gravity into the bowl. When the bowl is full, put the cap back on the hose. Empty the bowl. Repeat the procedure until water stops flowing out;
- clean the pump if necessary as previously described;
- replace the emergency emptying hose in its seat after having plugged it;
- screw the pump cover again and close the door.
Something not working

Certain problems are due to lack of simple maintenance or oversights, which can be solved easily without calling out an engineer. Before contacting your local Service Centre, please carry out the checks listed below.

During machine operation it is possible that the red Start/Pause pilot light flashes and one of the following alarm codes appears on the display to indicate that the machine is not working:

- **E10**: problem with the water supply
- **E20**: problem with water draining
- **E40**: door open.

Once the problem has been eliminated, press the Start/Pause button to restart the programme. If after all checks, the problem persists, contact your local Service Centre.

CE
Installation

Unpacking

All transit bolts and packing must be removed before using the appliance.

You are advised to keep all transit devices so that they can be refitted if the machine ever has to be transported again.

1. Using a spanner unscrew and remove the two rear bottom screws.

2. Slide out the two plastic pins.

3. Lay the machine on its back ensuring that the hoses are not crushed. Place one of the polystyrene angle packings under the machine.

3. Some models are provided with a bottom cover that will be found inside the washing machine drum. After ensuring the polyethylene bags have been removed, follow below instruction:

   (1). Locate the bottom cover as shown in position (A).
   (2). Then push the top end to lock to the bottom of washing machine.

4. Remove the polystyrene base, set the machine upright and unscrew the remaining rear screw. Slide out the relevant pin.

5. Cover all the open holes with the plugs which you can find in the bag containing the instruction booklet.
Positioning

Install the machine on a flat hard floor. Make sure that air circulation around the machine is not impeded by carpets, rugs etc. Check that the machine does not touch the wall or cupboard units.

Carefully level by screwing the adjustable feet in or out.

Never place cardboard, wood or similar materials under the machine to compensate for any unevenness in the floor.

Water inlet

Connect the water inlet hose to a tap with 3/4” BSP thread.

Use the hose supplied with the washing machine. DO NOT USE OLD HOSES.

The other end of the inlet hose which connects to the machine can be turned in any direction.

Simply loosen the fitting, rotate the hose and retighten the fitting, making sure there are no water leaks.

The inlet hose must not be lengthened. If it is too short and you do not wish to move the tap, you will have to purchase a new, longer hose specially designed for this type of use.

Water drainage

The end of the drain hose can be positioned in three ways:

**Hooked over the edge of a sink using the plastic hose guide supplied with the machine.**

In this case, make sure the end cannot come unhooked when the machine is emptying.

This could be done by tying it to the tap with a piece of string or attaching it to the wall.

**In a sink drain pipe branch.** This branch must be above the trap so that the bend is at least 60 cm above the ground.

**Directly into a drain pipe at a height of not less than 60 cm and not more than 90 cm.**

The end of the drain hose must always be ventilated, i.e. the inside diameter of the drain pipe must be larger than the outside diameter of the drain hose.

The drain hose must not be kinked. Run it along the floor; only the part near the drainage point must be raised.
Electrical Connection

This machine is designed to operate on a 220-240 V, single-phase, 50 Hz supply.

“An incorrect power supply may void your warranty.”

Check that your domestic electrical installation can take the maximum load required (2.0 kW), also taking into account any other appliances in use.

Important!

When the appliance is installed the power supply cable must be easily accessible. If this appliance is supplied from a cord extension set or electrical portable outlet device, the cord extension set or electrical portable device must be positioned so that it is not subject to splashing or ingress of moisture.

Connect the machine to an earthed socket.

The manufacturer declines any responsibility for damage or injury through failure to comply with the above safety precaution. Should the appliance power supply cable need to be replaced, this should be carried out by our Service Centre.
Environment concerns

Packaging materials

The materials marked with the symbol are recyclable.
>PE<=polyethylene
>PS<=polystyrene
>PP<=polypropylene
This means that they can be recycled by disposing of them properly in appropriate collection containers.

Old machine

Use authorised disposal sites for your old appliance. Help to keep your country tidy!
The symbol on the product or on its packaging indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

Ecological hints

To save water, energy and to help protect the environment, we recommend that you follow these tips:

- Normally soiled laundry may be washed without prewashing in order to save detergent, water and time (the environment is protected too!).
- The machine works more economically if it is fully loaded.
- With adequate pre-treatment, stains and limited soiling can be removed; the laundry can then be washed at a lower temperature.
- Measure out detergent according to the water hardness, the degree of soiling and the quantity of laundry being washed.
Electrolux Warranty

FOR SALES IN AUSTRALIA AND NEW ZEALAND
APPLIANCE: WASHING MACHINE

This document sets out the terms and conditions of the product warranties for Electrolux Appliances. It is an important document. Please keep it with your proof of purchase documents in a safe place for future reference should you require service for your Appliance.

1. In this warranty
   (a) ‘Electrolux’ means Electrolux Home Products Pty Ltd of 163 O’Riordan Street, Mascot, NSW 2020, ABN 51 004 762 341 in respect of Appliances purchased in Australia and Electrolux (NZ) Limited of 3-5 Nial Burgess Road, Mount Wellington, in respect of Appliances purchased in New Zealand;
   (b) ‘Appliance’ means any Electrolux product purchased by you accompanied by this document;
   (c) ‘Warranty Period’ means:
      (i) where the Appliance is used for personal, domestic or household use (i.e. normal single family use) as set out in the instruction manual, the Appliance is warranted against manufacturing defects in Australia for 24 months and in New Zealand for 24 months, following the date of original purchase of the Appliance;
      (ii) where the Appliance is used for commercial purposes (including being used to directly assist a business or where the Appliance is used in a multi-family communal or share type environment), the Appliance will then be warranted against manufacturing defects in Australia for 3 months and in New Zealand for 3 months, following the date of original purchase of the Appliance.
   (d) ‘you’ means the purchaser of the Appliance not having purchased the Appliance for re-sale, and ‘your’ has a corresponding meaning.
   (e) ASC means Electrolux authorised serviced centres.

2. This warranty only applies to Appliances purchased and used in Australia or New Zealand and in addition to (and does not exclude, restrict, or modify in any way) any non-excludable statutory warranties in Australia or New Zealand.

3. During the Warranty Period Electrolux or its ASC will, at no extra charge if your Appliance is readily accessible for service, without special equipment and subject to these terms and conditions, repair or replace any parts which it considers to be defective. Electrolux or its ASC may use remanufactured parts to repair your Appliance. You agree that any replaced Appliances or parts become the property of Electrolux.

4. Parts and Appliances not supplied by Electrolux are not covered by this warranty.

5. You will bear the cost of transportation, travel and delivery of the Appliance to and from Electrolux or its ASC. If you reside outside of the service area, you will bear the cost of:
   (a) travel of an authorised representative;
   (b) transportation and delivery of the Appliance to and from Electrolux or its ASC,
   In all instances, unless the Appliance is transported by Electrolux or an Electrolux authorised representative, the Appliance is transported at the owner’s cost and risk while in transit to and from Electrolux or its ASC.

6. Proof of purchase is required before you can make a claim under this warranty.

7. You may not make a claim under this warranty unless the defect claimed is due to faulty or defective parts or workmanship. Electrolux is not liable in the following situations (which are not exhaustive):
   (a) the Appliance is damaged by:
      (i) accident
      (ii) misuse or abuse, including failure to properly maintain or service
      (iii) normal wear and tear
      (iv) power surges, electrical storm damage or incorrect power supply
      (v) incomplete or improper installation
      (vi) incorrect, improper or inappropriate operation
      (vii) insect or vermin infestation
   (b) the Appliance is modified without authority from Electrolux in writing;
   (c) the Appliance’s serial number or warranty seal has been removed or defaced;
   (d) the Appliance was serviced or repaired by anyone other than Electrolux, an authorised repairer or ASC.

8. This warranty, the contract to which it relates and the relationship between you and Electrolux are governed by the law applicable where the Appliance was purchased. Where the Appliance was purchased in New Zealand for business purposes the Consumer Guarantee Act does not apply.

9. To the extent permitted by law Electrolux excludes all warranties & liabilities other than as contained in this document.

10. For Appliances and services provided by Electrolux in Australia, the Appliances come with a guarantee by Electrolux that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Appliance repaired or replaced if the Appliance falls to be of acceptable quality and the failure does not amount to a major failure.

11. For Appliances and services provided by Electrolux in New Zealand, the Appliances come with a guarantee by Electrolux pursuant to the provisions of the Consumer Guarantees Act, the Sale of Goods Act and the Fair Trading Act.

12. To enquire about claiming under this warranty, please follow these steps:
   (a) carefully check the operating instructions, user manual and the terms of this warranty;
   (b) have the model and serial number of the Appliance available;
   (c) have the proof of purchase (eg an invoice) available;
   (d) telephone the numbers shown below.

13. You accept that if you make a warranty claim, Electrolux and its ASC may exchange information in relation to you to enable Electrolux to meet its obligations under this warranty.
