Intended use
The washing machine is intended for use in the household only, for machine-washable fabrics and hand-washable wool hand/machine-washable textiles.

Environmentally friendly waste disposal
To ensure that it functions properly and is in perfect condition.

Important information
Environmental protection/Conservation tips
– Wash normally soiled washing without a pre-wash.
– Measure the detergent according to the manufacturer's instructions and water hardness.
– If the laundry is then dried in the tumble dryer, select the spin speed according to the instructions of the dryer manufacturer.
– Keep pets away from the washing machine.
– Never use a damaged machine.
– Do not leave children unattended near the washing machine or persons not familiar with the washing machine.
– Never dry-heat-dry the washing machine
– Do not dry-dry the washing machine
– Do not exceed the maximum load.

Preparing
– According to the information on the care labels.

Sorting and loading laundry
– Observe the important information – page 6.
– Do not exceed the maximum load – page 9.
– Follow the manufacturer's care information.

Additional function
– Individual settings.

Detergent drawer with 2 compartments
Compartment I: Detergent for the main wash, water softener, fabric softener, starch
Compartment II: Detergent for pre-wash

Drum

Control panel
– Programme selector
– Status
– Start/Pause
– Interruption indicator
– End of programme indicator

Washing
– Select Start/Pause
– Programme selector

Individual settings
– Quick wash
– Reduced wash time – only 2 rinse cycles.
– Suitable for slightly soiled washing.
– Recommended loading: up to a maximum of 3 kg.

Important information
– Environmental protection/Conservation tips
– Fasten zips, do up any buttons.
– If required, pretreat stains.
– Select programme
– Wash new items of clothing separately.
Congratulations - You have opted for a modern, high-quality domestic appliance manufactured by Bosch. The washing machine is distinguished by its economical energy consumption. Each machine that leaves our factory has been inspected thoroughly to ensure that it functions properly and is in perfect condition.

For further information and a selection of our products go to our web site: www.bosch-home.com

Environmental friendly waste disposal
All packaging must be disposed of in accordance with environmental guidelines. This appliance is certified in accordance with European Directive 2002/96/EC on waste electrical and electronic equipment (WEEE). This directive provides the framework for the EU-wide collection and reuse of used appliances.

**Environmental protection/Conservation tips**

- Always fill the washing machine with a maximum amount of laundry for the relevant programme.
- Wash normally soiled washing without a pre-wash.
- Instead of Cotton at 90 °C, choose the programme Cotton at 60 °C. Comparable cleaning result with significantly lower energy consumption.
- Measure the detergent according to the manufacturer's instructions and water hardness.
- If the laundry is then dried in the tumble dryer, select the spin speed according to the instructions of the dryer manufacturer.
Sorting and loading laundry
Follow the manufacturer's care information. According to the information on the care labels. According to type, colour, soiling and temperature. Do not exceed the maximum load — page 7.

Observe the important information — page 6.
Insert large and small items of laundry. Take care not to trap items of laundry between the washing machine door and the rubber seal.

Add detergent and care products
Measure accordingly: Amount of laundry, soiling, water hardness (ask your water supply company) and manufacturer's instructions.

Before washing for the first time
Wash once without any laundry — page 9.

Dilute thick fabric softener and fabric conditioner with water. This prevents blockages.

Setting and adjusting programmes
Additional function — Individual settings, page 5.

Select Start/Pause

Removing the washing
Open the washing machine door and remove the washing.

– Remove any foreign objects - risk of rusting.
– Leave the washing machine door and detergent drawer open so that any residual water can evaporate.

Turning the tap off
Turn the programme selector to Off.

Switching off

End of programme when ...
... the status indicator Spin flashes.

Interrupting the programme
Programmes at high temperatures:
– Cool washing: Select Rinse.
Washing machine door remains locked.
Programmes at lower temperatures:
– Select Spin or Drain.
– Select Start/Pause.

Changing the programme, if ...
... you have selected the wrong programme by mistake:
– Reselect the programme.
– Select Start/Pause.
Individual settings

- **Additional function** → and overview of programmes, see page 7
  - Rinse plus 🛐 Additional rinse cycle. For areas with very soft water or for further improvement of the rinsing result.
  - Quick wash 🛐 Reduced wash time - only 2 rinse cycles. Suited for slightly soiled washing. Recommended load: up to a maximum of 3 kg.
- **Start/Pause** � 商品
  For starting or interrupting the programme.

### Important information

**Protecting the washing and the machine**
- Empty pockets.
- Look out for metal items (paperclips, etc.).
- Wash delicates in a laundry bag (tights, curtains, underwired bras).
- Fasten zips, do up any buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place in the laundry bag.

**Washing with varying degrees of soiling**

<table>
<thead>
<tr>
<th>Degree of Soiling</th>
<th>Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>light</td>
<td>Wash new items of clothing separately. Do not pre-wash. If required, pretreat stains. Select programme <strong>Cotton ☀ Stains ☀ 60°C.</strong></td>
</tr>
<tr>
<td>heavy</td>
<td>Load less washing. Prewash. <strong>Prewash.</strong></td>
</tr>
</tbody>
</table>

**Soaking**

Load washing of the same colour

Pour soaking agent/detergent into compartment II in accordance with the manufacturer's instructions. Turn the programme selector to **Cotton ☀ cold** and select **Start/Pause ⊖**. After approx. 10 minutes, select **Start/Pause ⊖** to pause the programme. Once the required soaking time has elapsed, select **Start/Pause ⊖** again to continue the programme, or select a different programme.

**Starching**

Washing must not be treated with fabric softener

Starching is possible in all wash programmes if liquid starch is used. Pour the starch in accordance with the manufacturer's instructions into fabric softener compartment 🟢 (rinse first if necessary).

**Dyeing/bleaching**

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions! Do **not** use the washing machine for bleaching clothes!
## Overview of Programmes

Refer to the table of consumption values on page 8 and notes on page 6.

* Programme setting with maximum spin speed for testing according to AS/NZS 2040.2 and AS/NZS 6400.

** The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, programme setting, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional functions.

---

### Safety Instructions

- Read the instruction manual and installation instructions and all other information enclosed with the washing machine and act accordingly.
- Retain the documents for subsequent use.

#### Risk of electric shock
- Never pull the cable to disconnect the mains plug.
- Never insert/disconnect the mains plug with damp hands.

#### Danger to life
- For worn-out appliances:
  - Disconnect the mains plug.
  - Sever the mains cable and discard along with the plug.
  - Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

#### Risk of suffocation
- Keep packaging, film and packaging parts out of the reach of children.

#### Risk of poisoning
- Keep detergents and care products out of the reach of children.

#### Risk of explosion
- Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may cause an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand.

#### Risk of injury
- The washing machine can become very hot. Be careful when opening the detergent drawer while the machine is in operation.
**Care**

**Before washing for the first time**

Do not put any washing in the machine. Turn on the tap, add approximately 1 litre of water and then ½ a measuring cup of detergent into compartment I. Turn the programme selector to Easy-care, 60 °C and select Start/Pause. At the end of the programme, turn the programme selector to Off.

**Machine housing, control panel**

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
- Remove detergent and cleaning agent residue immediately.
- Do not clean with a jet of water.

**Cleaning the detergent drawer...**

If it contains detergent or fabric softener residues.

1. Pull out, press insert down, remove drawer completely.
2. To remove the insert: press the insert upwards from below with your finger.
3. Clean the detergent dispenser tray and insert with water and a brush and dry it.
4. Attach the insert and engage (connect the cylinder to the guide pin).
5. Push in the detergent drawer.

Leave the detergent drawer open so that any residual water can evaporate.

**Drum**

Leave the washing machine door open so that the drum can dry out.

Rust stains - use chlorine-free cleaning agent, not steel wool.

**Descaling**

Ensure there is no laundry in the machine.

Descaling the appliance according to the descaler manufacturer’s instructions. This should not be necessary if the correct dosage of detergent is used.

**Information to indicator lights**

Indicator lights for status displays and/or buttons flash:

<table>
<thead>
<tr>
<th>Indicator lights</th>
<th>Close the washing machine door properly; laundry may be caught.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rinse and Wash</td>
<td>Open the tap completely, supply hose kinked or trapped; Clean the filter -&gt; page 10. Water pressure too low.</td>
</tr>
<tr>
<td>Spin and Wash</td>

</tr>
<tr>
<td>Spin and Rinse</td>
<td>Motor fault. Call the after-sales service.</td>
</tr>
<tr>
<td>Spin</td>
<td>Motor fault. Call the after-sales service.</td>
</tr>
<tr>
<td>Do not immerse the HydroSafe safety device in water (contains an electric valve).</td>
<td></td>
</tr>
</tbody>
</table>

**Maintenance**

**Detergent solution pump**

Turn the programme selector to Off and disconnect the mains plug.

1. Open and remove the service flap.
2. For models with a drainage hose: Remove the drainage hose from the retaining and pull it from the housing. Remove the container. Remove the sealing cap, allow the detergent solution to flow out. Replace the sealing cap and place the drainage hose in the retaining.
3. For models without a drainage hose: Carefully unscrew the pump cover (residual water).
4. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).
5. Replace the pump cover and screw it tightly.
6. Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 1 litre of water into compartment II and start the Drain programme.

**Drainage hose at the siphon**

Turn the programme selector to Off and disconnect the mains plug.

1. Loosen the hose clamp, carefully remove the drainage hose (residual water).
2. Clean the drainage hose and siphon connecting piece.
3. Reattach the drainage hose and secure the connection with the hose clamp.

**Filter in the water supply**

- Risk of scalding. Allow the detergent solution to cool down.
- Turn off the tap.

Reduce the water pressure in the supply hose:

1. Turn off the tap.
2. Select any programme (except Spin /Drain).
3. Select Start/Pause. Let the programme run for approximately 40 seconds.
4. Turn the programme selector to Off. Disconnect the mains plug.
5. Depending on model:
   - Disconnect the hose from the tap.
   - Clean the filter using a small brush.

and/or for Standard and HydroSafe models:

Remove the hose on the rear of the appliance, remove the filter with pliers and clean.
2. Connect the hose and check for leaks.
# What to do if ...

<td>Occasionally, phosphate-free detergents contain water-insoluble residues.</td>
</tr>
<tr>
<td></td>
<td>Select Rinse 📧 or brush the laundry after washing.</td>
</tr>
</tbody>
</table>

If you cannot correct a fault yourself or a repair is required:
- Turn the programme selector to Off and remove the mains plug from the socket.
- Turn off the water supply and call the after-sales service -> Installation instructions.

Observe the safety instructions on page 8.

Read these instructions and the separate installation instructions before operating the washing machine.
