## 60cm 11 Function Pyrolytic Built-in Oven - Companion oven - 90L Gross Capacity

Built for performance, with ActiveVent technology and an intuitive control system that allows for precise cooking mode selection across 11 oven functions. The generous 90L gross capacity fits 30 percent more than traditional European ovens and this model offers a pyrolytic self-cleaning function. Finished in black reflective glass with polished metal trim the sleek lines and design detail match the rest of the Fisher & Paykel kitchen appliance family.

## Features & Benefits

### What is ActiveVent Technology?

Fisher & Paykel's ActiveVent system allows you to control the removal or retention of moisture from the baking or roasting environment to get the very best cooking results and energy consumption.

### Pre-Set Oven Functions

The range features models with 11, nine or seven oven functions. The 11 and nine function models have pre-set temperatures that deliver just what you need to cook each dish to perfection, at the touch of a dial.

### Designed to Match

This 11 Function Pyrolytic Built-in oven is finished in black reflective glass and stainless steel that blends elegant, minimalist aesthetic with design for durability. The finish and handle matches the rest of Fisher & Paykel's coordinated companion product family.

### Easy Clean

Our pyrolytic self-cleaning models break down food residues at a very high temperature, leaving light ash that's easily removed, while our catalytic models break down oil and fat splashes during normal cooking.

### Sized to suit

Sized to fit the food you cook, Fisher & Paykel has one of the largest Built-in Ovens on the market, providing 90L total and 77L of usable capacity. The maximised height means you are able to fit a large casserole dish, the family roast and even a pie as well— true multi-shelf cooking. Two shelves can be fully utilised at the same time without hot spots or uneven browning. A 5.5kg turkey or other cut of meat can be deliciously cooked using the optional rotisserie kit.

### Accessories

The 5.5kg capacity Rotisserie Kit option (nine and 11 Function models) ensures delicious roasts are browned evenly as the surface is continuously basted. Crafted from heavy gauge enamelled steel, the three-piece dish system includes a deep roasting dish, splatter tray and grill rack (model dependent).

## Specifications

### Accessories
