

Neato Robotics

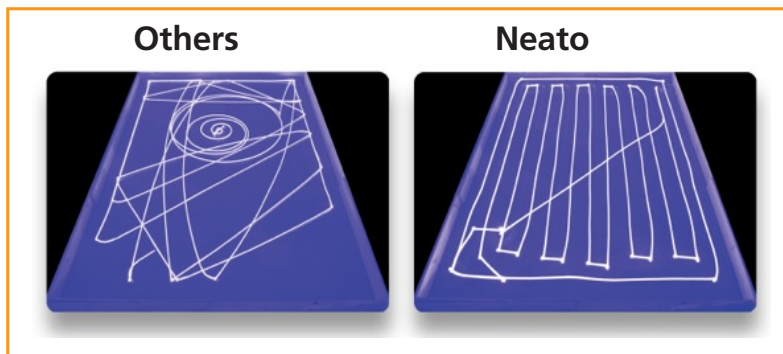

Neato Robotics Series

The new Neato Robotic Vacuum Cleaner Series combines advanced robotic technology and thoughtful, user-friendly design to clean the home better than the rest.

It features patented Neato BotVision™ a breakthrough in laser guided mapping and navigation - to scan, plan and methodically vacuum room by room, instead of bumping around randomly. This offers a faster, more efficient clean. With its powerful 'true vacuum' suction, Neato Bot-Vac™ will clean dirt, crumbs, and dust bunnies from all floor types and every corner of your home.

Smartest Robot

- Advanced laser-guided navigation
- Multi-room cleaning
- Cleans more square feet on one cleaning run, returns to base and returns where it left off to finish job
- Gets closer to edges and corners
- Automatically detects and avoids stairs and cleans carefully around furniture
- Automatic daily or instant cleaning
- Set it to clean automatically for you every day
- Just push a button for instant cleaning
