Operating Instructions and Cook Book
Steam Convection Microwave Oven
Household Use Only

Model No. NN-CS894S

Please read these instructions carefully before using this product, and save this manual for future use.
We are glad you have chosen to purchase a PANASONIC microwave oven. Before operating this oven, please read these instructions carefully and completely, and keep them for further reference.

If you have only used a microwave oven for reheating and defrosting, with Panasonic's Inverter Technology you can be reassured of excellent results when cooking a variety of foods, as the ‘soft’ penetration of microwave energy to the centre of food helps prevent over cooking on edges and surfaces. Foods can now be gently simmered without the concern of boil over.

After reading the introductory chapter, we are sure you will be able to master the basic techniques and thereby develop a firm understanding of your new oven. This book includes recipes from starters to desserts. After trying our recipes be sure to adapt your favourite recipes to microwave methods.

Start experimenting now, and enjoy the first class results you will achieve by using your new microwave oven.

Precautions to be taken when using Microwave Ovens for Heating foodstuffs

INSPECTION FOR DAMAGE. A microwave oven should only be used if an inspection confirms all of the following conditions:
1. The grille is not damaged or broken.
2. The door fits squarely and securely and opens and closes smoothly.
3. The door hinges are in good condition.
4. The metal plates of a metal seal on the door are neither buckled nor deformed.
5. The door seals are neither covered with food nor have large burn marks.

PRECAUTIONS. Microwave radiation from microwave ovens can cause harmful effects if the following precautions are not taken:
1. Never tamper with or deactivate the interlocking devices on the door.
2. Never poke an object, particularly a metal object, through a grille or between the door and the oven while the oven is operating.
3. Never place saucepans, unopened cans or other heavy metal objects in the oven.
4. Do not let other metallic articles, e.g., fast food foil containers, touch the side of the oven.
5. Clean the oven cavity, the door and the seals with water and a mild detergent at regular intervals.
6. Always use the oven with trays or cookware recommended by the manufacturer.
7. Never operate the oven without a load (i.e., an absorbing material such as food or water) in the oven cavity unless specifically allowed in the manufacturer’s literature.
8. For horizontally hinged doors, never rest heavy objects such as food containers on the door while it is open.
9. Do not place sealed containers in microwave ovens. Baby bottles fitted with a screw cap or a teat are considered to be sealed containers.
10. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
11. Young children should be supervised to ensure that they do not play with the appliance.
12. It is hazardous for anyone other than a competent person to carry out any service or repair operation that involves the removal of a cover which gives protection against exposure to microwave energy.
13. The surfaces are liable to get hot during use.

Practical Hints:
1. For initial use of GRILL, CONVECTION, and CRISPY GRILL, if you see white smoke arise, it is not malfunction.
2. Exterior oven surfaces, including air vents on the cabinet and the oven door will get hot during GRILL, CONVECTION, and CRISPY GRILL. Use care when opening or closing door and when inserting or removing food and accessories.
3. The oven has two grill heaters situated in the top of the oven and a convection heater situated in the back of the oven. After using the GRILL, CONVECTION, and CRISPY GRILL functions, the oven will be very hot.
4. The accessible parts may become hot when GRILL, CONVECTION and CRISPY GRILL is in use. Children should be kept away.

Important Instructions
WARNING—To reduce the risk of burns, electric shock, fire, injury to persons or excessive microwave energy:
1. Read all instructions before using the microwave oven.
2. Some products such as whole eggs and sealed containers - (for example, closed glass jars and sealed baby bottles with teat) - may explode and should not be heated in the microwave oven.
3. Use this microwave oven only for its intended use as described in this manual.
4. As with any appliance, close supervision is necessary when used by children.
5. Do not operate this microwave oven if it is not working properly or if it has been damaged or dropped.
6. Do not store or use this appliance outdoors.
7. Do not immerse cord or plug in water.
8. Do not allow cord to come into contact with hot surfaces.
9. Do not let cord hang over edge of table or counter.
10. To reduce the risk of fire in the oven cavity:
(a) Do not overcook food. Carefully attend microwave oven if paper, plastic, or other combustible materials are placed inside the oven to facilitate cooking.
(b) Heating therapeutic wheat bags is not recommended. If heating, do not leave unattended and follow manufacturers’ instructions carefully.
(c) Remove wire twist-ties from bags before placing bag in oven.
(d) If materials inside the oven should ignite, keep oven door closed, turn oven off at the wall switch, or shut off power at the fuse or circuit breaker panel.
(e) Never leave microwave unattended while cooking or reheating.
11. Do not remove outer panel from oven.
12. Appliances are not intended to be operated by means of an external timer or separate remotecontrol system.
13. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.
Important Safety Instructions

Circuits
Your microwave ovens should be operated on a separate circuit from other appliances. The voltage used must be the same as specified on this microwave oven. Failure to do this may cause the power board fuse to blow, and/or food to cook slower. Do not insert higher value fuse in the power board.

Earthing Instructions
This microwave oven must be earthed. In the event of an electrical short circuit, earthing reduces the risk of electric shock by providing an escape wire for the electric current. This microwave oven is equipped with a cord having an earthing wire with an earthing plug. The plug must be plugged into an outlet that is properly installed and earthed. WARNING—Improper use of the earthing plug can result in a risk of electric shock.

WARNING
a) The door seals and door seal areas should be cleaned with a damp cloth. The appliance should be inspected for damage to the door seals and door seal areas and if these areas are damaged the appliance should not be operated until it has been repaired by a qualified service technician trained by the manufacturer.
b) It is dangerous for anyone other than a service technician trained by the manufacturer to perform repair service.
c) If the supply cord of this appliance is damaged, it must be replaced by a qualified service technician with the special cord available only from the manufacturer.
d) Before use, the user should check that whether the utensils are suitable for use in microwave ovens.
e) Liquids or other foods must not be heated in sealed containers since they are liable to explode, at the same time it should avoid the boiling liquids splash.
f) Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.
g) When the appliance is operated in the GRILL, CONVECTION and CRISPY GRILL modes, children should only use the oven under adult supervision due to the temperatures generated.

(This statement applicable only to New Zealand.)

We certify that this microwave oven has been inspected and complies with the safety requirements of government notice 466 of March 1981, and complies with the Radio Regulation of government notice 587 of March 1986.
(This statement applicable only to South Africa)

Installation and General Instructions

General Use
1. In order to maintain high quality, do not operate the oven when empty. The microwave energy will reflect continuously throughout the oven if no food or water is present to absorb energy. This can lead to damage to the microwave oven including arcing within the oven cavity.
2. If smoke is observed, touch the STOP/RESET key and leave door closed in order to stifle any flames. Disconnect the power cord, and/or shut off power at the fuse or circuit breaker panel.
3. The microwave oven is intended for heating food and beverages. Drying of food or clothing and heating of warming pads, slippers, sponges, damp cloth and similar may lead to risk of injury, ignition or fire.
4. Do not use recycled paper products, unless the paper product is labeled as safe for microwave oven use. Recycled paper products may contain impurities which may cause sparks and/or fires when used.
5. Do not use newspapers or paper bags for cooking.
6. Do not hit or strike the Control Panel. Damage to controls may occur.
7. POT HOLDERS may be needed as heat from food is transferred to the cooking container and from the container to the oven. The oven can be very hot after removing the cooking container.
8. Do not store flammable materials next to, on top of, or in the oven. It could be a fire hazard.
9. Do not cook food directly on ceramic plate unless indicated in recipes. (Food should be placed in a suitable cooking utensil.)
10. DO NOT use this oven to heat chemicals or other non-food products. DO NOT clean this oven with any product that is labelled as containing corrosive chemicals. The heating of corrosive chemicals in this oven may cause microwave radiation leaks.
Installation and General Instructions (continued)

11. If the base of the oven is hot, allow to cool before cleaning or placing in water.
12. When using the CRISPY GRILL mode, never place any aluminum or metal container directly on the grill tray. Always insert a heat-proof, glass plate or dish between the and the aluminum container. This will prevent sparking that may damage the oven.
13. It is recommended not to use the metal tray when cooking in the MICROWAVE mode only.
14. During cooking, some steam will condense inside and/or on the oven door. This is normal and safe. Steam will disappear after the oven cools down.
15. Do not leave the microwave unattended while reheating or cooking food in disposable containers made of plastic, paper or other combustible materials, as these types of containers can ignite if overheated.

Placement of Oven
1. The oven must be placed on a flat, stable surface, more than 85 cm above the floor. For correct operation, the oven must have sufficient air flow. Allow 15 cm of space on the top of the oven, 10 cm at the back, and 5 cm on both sides. If one side of the oven is placed flush to wall, the other side or top must not be blocked. Do not remove feet.
   a. Do not block air vents. If they are blocked during operation, the oven may be overheated and damaged. When using any cloth over the oven, the air intake and exhaust should not be blocked. Do not place a cloth on top of the unit during GRILLING/CRISPY GRILL/CONVECTION/ cooking as the top of the microwave gets very hot. Also allow sufficient space on back and both sides of the oven.
   b. Do not place oven near a hot or damp surface such as a gas stove, electric range or sink etc.
   c. Do not operate oven when room humidity is too high.
2. This appliance is intended to be used in household and similar applications such as: staff kitchen areas in shops, offices and other working environments; farm house; by clients in hotels, motels and other residential environments; bed and breakfast type environments.
3. The appliance is freestanding type and shall not be placed in a cabinet.

Food
1. Do not use your oven for home canning or the heating of any closed jar. Pressure will build up and the jar may explode. In addition, the microwave oven cannot maintain the food at the correct canning temperature. Improperly canned food may spoil and be dangerous to consume.
2. Do not attempt to deep fat fry in your microwave oven.
3. Do not boil eggs in their shell and whole hard-boiled eggs (unless otherwise stated in Cooking Guide section). Pressure will build up and the eggs will explode.
4. Potatoes, apples, egg yolks, chicken wings, whole squash and sausages are examples of foods with nonporous skins. This type of food must be pierced before cooking, to prevent bursting.
5. When heating liquids, e.g. soup, sauces and beverages, in your microwave oven, overheating the liquid beyond boiling point can occur without evidence of bubbling. This could result in a sudden boil over of hot liquid. To prevent this possibility the following steps should be taken:
   a) Avoid using straight-sided containers with narrow necks.
   b) Do not overheat.
   c) Stir the liquid before placing the container in the oven and halfway through cooking time.
   d) After heating, allow to stand in the oven for a short time, stirring again before carefully removing the container.
6. DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN. To check the degree of cooking of roasts and poultry use a MICROWAVE THERMOMETER. Alternatively, a conventional meat thermometer may be used after the food is removed from the oven. If undercooked, return meat or poultry to the oven and cook for a few more minutes at the recommended power level. It is important to ensure that meat and poultry are thoroughly cooked.
7. COOKING TIMES given in the Cooking Guide section are APPROXIMATE. Factors that may affect cooking time are preferred degree of moisture content, starting temperature, altitude, volume, size, shape of food and utensils used. As you become familiar with the oven, you will be able to adjust for these factors.
8. It is better to UNDERCOOK RATHER THAN OVERCOOK foods. If food is undercooked, it can always be returned to the oven for further cooking. If food is overcooked, nothing can be done. Always start with minimum cooking times recommended.
9. Extreme care should be taken when cooking popcorn in a microwave oven. Cook for minimum time as recommended by manufacturer. Use the directions suitable for the wattage of your microwave oven. NEVER leave oven unattended when popping popcorn.
10. When heating food in plastic or paper containers, check the oven frequently due to the possibility of ignition.
11. The contents of feeding bottles and baby food jars are to be stirred or shaken and the temperature is to be checked before consumption, in order to avoid burns.
Microwaves are a form of high frequency radio waves similar to those used by a radio, including AM, FM and CB. They are similar to a television where the radio waves are converted to a picture on the screen. However, microwaves are much shorter than radio waves; approximately twelve centimetres wave length. Electricity is converted into microwave energy by the magnetron tube (which is the heart of the microwave oven).

From the magnetron tube, microwave energy is transmitted to the oven cavity. The microwaves are converted to heat in the food. The microwaves enter from the outside of the food and travel through the food losing half of their power every two to three centimetres. Continued cooking to the centre occurs by conduction.

Although pacemakers used to be affected by microwaves (as well as by other radio waves), they are now shielded and are not bothered by these interferences. This allows people with pacemakers to sit calmly by their radio or television and cook with microwave ovens.

When microwaves come in contact with a substance, any one of CRISPY GRILL of three things may occur. They can be:
1. REFLECTED
2. TRANSMITTED
3. ABSORBED

Reflection:
Metal substances REFLECT microwave energy and because there is no absorption, there is no heating. This is why the oven interior is either stainless steel or epoxy-coated steel. This ensures that the microwaves are kept inside the cavity and evenly distributed throughout the food with the help of the turntable.

Transmission:
Such substances as paper, glass and plastic TRANSMIT microwave energy and do not become hot except from food. Because these substances do not reflect or absorb microwave energy, they are ideal materials for microwave cooking containers.

Absorption:
Food contains moisture and will ABSORB microwave energy, which causes the moisture molecules within the food to vibrate at an incredible rate (2,450,000,000 times per second). Friction, created by the vibration, produces heat energy which is conducted throughout the food.

Cookware and Utensils Guide

It is important to use the correct container when cooking in a microwave oven. The following will help you make the right selection.

How to Test a Container for Safe Microwave Oven Use
TO TEST A CONTAINER FOR SAFE MICROWAVE OVEN USE: Fill a 1-cup glass measure with cool water and place it in the microwave oven alongside the empty container to be tested; heat one (1) minute at High. If the container is microwave ovensafe (transparent to microwave energy), the container should remain comfortably cool, the water in glass measure should be hot. If the container is hot, it has absorbed some microwave energy and should NOT be used. This test cannot be used for plastic containers.

Paper Products and Freezer Wrap
Waxed paper, paper plates, cups and napkins should not be used for heating or cooking food. Freezer wrap should not be used as it is not heat resistant and may melt. Paper towel, greaseproof paper and bake paper may be safely used for short periods of time for covering or lining.

Glass, Ceramic and China
Heat-Resistant glass cookware is invaluable in microwave cooking. Many of these items are readily available in most homes: glass jugs, mixing bowls, loaf dishes, covered casseroles, oblong baking dishes, pie plates and round or square cake dishes. Examples of this type of cookware are Pyrex® and Corningware®.

Dinnerware can be used for microwave heating. Many brands of dinnerware are microwave safe. Check the care information for reference to microwave use for dinnerware and serving pieces. If dinnerware is marked ovenproof, it frequently is safe to use in the microwave oven. However, to be sure, check by conducting microwave dish test previously mentioned.

Several types of glassware and dinnerware are not recommended for use in the microwave oven. Do not use dishes with metallic trim or containers with metal parts. Do not use cups or mugs with glued on handles, as they may fall off with continued heating. Do not use delicate glassware. Although the glassware may be transparent to microwave energy the heat from the food may cause the glassware to crack.
Cookware and Utensils Guide

Plastic
Plastic dishes, cups and some freezer containers should be used with care in a microwave oven. Choose plastic containers carefully, as some plastic containers may become soft, melt and may scorch. The majority of plastic dishes, even those designed for use in the microwave oven, are not suitable for cooking foods with high fat or sugar content, or for lengthy cooking times. Most microwave plastic dishes should not be used for longer than 3 to 5 minutes on High power. These dishes, although not suitable for extended cooking, may be used successfully for defrosting or for use on lower power levels. Cooking Bags designed to withstand boiling, freezing, or conventional heating are microwave safe. Prepare bags according to manufacturer’s directions. When cooking by microwave, DO NOT use wire twist-ties to close bag. They can act as an antenna and cause arcing (sparks). DO NOT COOK IN PLASTIC FOOD STORAGE BAGS. Plastic Wrap such as GLAD WRAP® can be used to cover dishes in most recipes. Over an extended heating time, some disfiguration of the wrap may occur. When removing plastic wrap "covers", as well as any glass lid, be careful to remove it away from you to avoid steam burns. Loosen plastic but let dish stand, covered.

Jars and Bottles
Jars and bottles can be used to warm food to serving temperature, if the lid is removed first. Cooking should not be done in these containers since most are not heat resistant and during extended heating times, heat from food would cause cracking or breaking.

Metal
Metal cookware or utensils, or those with metallic trim, should NOT be used in the microwave. Since microwave energy is reflected by metal, foods in metal containers will not cook evenly. There is also a possibility of “arching”. Although metal utensils should be avoided in microwave cooking, some metal can be helpful when used correctly. Aluminum foil can be used safely, if certain guidelines are followed, to prevent overcooking. Small pieces of foil are used to shield areas such as chicken wings, tips of roasts, or other thin parts that cook before the rest of the recipe is finished. Make sure foil is attached securely and doesn’t touch sides of oven, otherwise arcing may occur. Foil lined containers, either cardboard or plastic, should NOT be used in the microwave oven as arcing could occur.

Metal twist-ties, either paper or plastic coated, should NOT be used in the microwave oven. Frozen dinner trays can be used in the microwave, if the container is no deeper than 2 cm and is filled with food. Metal skewers can not be used in microwave ovens as arcing may occur. Wooden skewers are readily available and give the same result.

Shells: Scalloped baking shells are best used during reheating and for short periods of cooking time only.

Thermometers are available for use in microwave ovens. DO NOT USE CONVENTIONAL MERCURY TYPE CANDY OR MEAT THERMOMETERS in food while cooking in the microwave oven.

Straw, Wicker and Wood
Straw and wicker baskets may be used in the microwave oven for short periods of time to warm rolls or bread. Large wooden utensils, such as bowls or cutting boards should NOT be used for prolonged heating as the microwave energy may cause the wood to become dry and brittle.

3. The maximum weight that can be placed on the glass shelf is 4 kg (this includes total weight of food and dish).

**Grill tray**
1. Do not place it on the oven window. Otherwise, the oven window may be damaged.
2. Place it on the shelves when using.
3. When cooking food, place it in the middle of wavy range of the grill tray, avoiding letting the food into the groove around, so that food can't be completely baked.

**Metal tray**
1. The metal tray is for cooking on GRILL, CONVECTION and STEAM PLUS mode. Do not use on other modes.
2. For 2 level CONVECTION cooking, the grill tray can be used as the upper level and the metal tray can be used as the lower level.
3. The maximum weight that can be placed on the metal tray is 4 kg (this includes total weight of food and dish).

**Plastic trivet**
1. The plastic trivet is placed inside the glass shelf to cook on STEAM or 300 W + STEAM mode. Food can be placed directly on the plastic trivet.
2. Do not use the plastic trivet for other modes.
3. The plastic trivet is dishwasher safe.
Oven Light:
Oven Light will turn on during cooking and also when door is opened.

NOTE:
The above illustration is for reference only.

Drip Tray
1. Before using the oven, the drip tray must be fitted as it collects excess water during cooking. The drip tray should be removed and cleaned on a regular basis.
2. Connect the drip tray to the plastic feet, as shown in the diagram, before using the oven.
3. Clean and wipe dry after use.
4. After cleaning, re-connect the drip tray to the plastic feet.
5. Fit the drip tray by holding with both hands and clicking onto the front legs of the oven.
6. To remove the drip tray, hold with both hands and gently ease forward. Wash in warm soapy water. Re-position the drip tray by clicking back onto the legs.
7. DO NOT USE A DISHWASHER TO CLEAN THE DRIP TRAY.

Water tank
Carefully remove the water tank from the oven. Remove the lid and fill with tap water (do not use mineral water). Replace the lid and position back in the oven. Ensure the lid is closed tightly and securely positioned, otherwise leakage may occur. It is recommended to clean the water tank in warm water once a week. See page 46 for reference.

Beep Sound
When key is touched correctly, a beep sound will be heard. If a key is touched and no beep is heard, the unit does not or cannot accept the instruction. The oven will beep twice between programmed stages. At the end of any complete programme, the oven will beep five times.

NOTE:
1. If an operation is set and Start key is not touched, after 6 minutes, the oven will automatically cancel the operation. The display will revert back to clock or colon mode.
2. The oven will enter stand-by mode after the last operation has completed. When in stand-by mode, the brightness of the display will be reduced.
3. When in stand-by mode, it is necessary to open and close the oven door before operating the oven.
Display Window

To help you operate the oven, the following numbers/symbols will appear in the display window.

Slider Bar Features

Select the time or weight by tapping "+/-" or swipe the slider bar. The time/weight appears in the display window.

TIME SETTING
To set cooking time or clock.

POWER LEVEL/TEMPERATURE SETTING
To set power level or temperature.

WEIGHT SETTING
To set weight of food for turbo defrost, auto menu and steam menu.

MENU SETTING
To set sensor menu, auto menu and steam menu.

MORE/LESS SETTING
To set more/less for sensor menu.

NOTE:
The maximum programmable time using slider bar is up to 9 hours.
Let’s Start To Use Your Oven!

1 Plug in.
Plug into a properly earthed electrical outlet. “WELCOME TO PANASONIC MICROWAVE OVEN COOKING” appears in the display window. (This will immediately cease when any key is accepted.)

2 Open Door.
Open the door and place container with food on flat table in the oven. Then close the door.

3 Touch \( \text{once} \).
Touch to select “Micro Power”.

4 Select Micro Power Level.
Tap “+”/“-” or swipe the slider bar until the desired power appears in the display window. (see page 15 for Micro Power chart)

5 Touch \( \text{Set} \).
Touch the Set key to verify your selected power level.

6 Set Time.
Tap “+”/“-” or swipe the slider bar until the desired time appears in the display window.

7 Touch \( \text{Cook} \).
Cooking will start. The time in display window will count down.

Operation Guide in the Display Window

To assist you in programming your oven, the following operation will appear in the display window. When you become familiar with your oven, the Operation Guide can be turned off.

To turn off:

- Tap Timer/Clock four times. Operation Guide OFFColon or time of day appears in the display window.

To turn on:

- Tap Timer/Clock four times. Operation Guide ONColon or time of day appears in the display window.
To Set Clock

You can use the oven without setting the clock.

1 Tap [twice].

“SET TIME” appears in the display window. The colon and “+/−” starts to blink.

2 Enter time.

Enter the time by tapping “+/−” or swipe the slider bar.

Clock is a 12 hour display. There isn’t a.m. or p.m. setting.

3 Touch [once].

Time of day is entered and locked into display window.

NOTES:
1. Oven will not operate while colon is still blinking.
2. One tap of the “+/−” will increase or decrease the time by 1 minute. Holding “+/−” will rapidly increase or decrease the time.
3. To reset time of day, repeat step 1 to 3.
4. The clock will keep the time of day as long as oven is plugged in and electricity is supplied.
5. This is a 12 hour clock.

To Use Child Safety Lock

This feature allows you to prevent operation of the oven by a young child; however, the door will open.

You can set Child Safety Lock when colon or time of day is displayed.

To set

Colon or time of day is displayed. Tap 3 times. display window.

To cancel

display window. Tap 3 times. Colon or time of day is displayed.

NOTE:
To set or cancel child safety lock, Start key or Stop/Reset key must be tap 3 times within 10 seconds.

To Cook/Reheat/Defrost on Micro Power by Time Setting

This feature allows you to set the desired power and time for cooking by yourself.

1 Touch \( \equiv \) once.
   Touch to select “Micro Power”.

2 To select Micro Power Level.
   Select the Micro Power Level by tap “+”/“-” or swipe the slider bar (see chart below).

   Note: When selecting 1000 W on the first stage, you can start from step 4.

3 Touch \( \rightarrow \) once.
   Touch the Set key to verify your selection Micro Power level.

4 To select the cooking time.
   Select the cooking time by tap “+”/“-” or swipe the slider bar.

   (1000 W and 300 W + steam: up to 30 minutes, other powers: up to 90 minutes for a single stage)
   NOTE: When cooking time is longer than 60 minutes, the time will appear in hours and minutes.
   0 - 3 minute time counts up in 10 seconds. 3 - 8 minute time counts up in 30 seconds. 8 - 30 minute
time counts up in 1 minute. Upwards from 30 minutes time counts up in 5 minutes.

5 Touch \( \bigcirc \).
   Cooking will start.
   The time in the display window will count down.

   For more than one stage cooking, Repeat steps 1 to 4 above then touch Start. The maximum number of stages for cooking is 3. The oven
   will beep twice between stages. (For further information, refer to page 28.)

Micro Power:
The Micro Power key gives you a selection of different power levels representing decreasing amounts of
microwave energy, used for cooking foods at different speeds.
e.g. The lower the micro power setting, the more evenly the food cooks, although it will take a little longer. To
select the correct power level for cooking different foods, refer to the chart below.

**To Defrosting**

**Turbo Defrost**
This feature allows you to defrost meat, poultry and seafood automatically by just setting the weight of the food.

1 **Touch** 🥤 once.
   Touch to select "Turbo Defrost".

2 **Set weight.**
   The shape and size of the food will determine the maximum weight the oven can accommodate. The recommended maximum weight of food depends on the oven cavity size. Weight must be programmed in kilograms and tenths of a kilogram (0.1 kg ~ 3.0 kg). For best results, the minimum recommended weight is 0.1 kg.
   
   Select the required weight by tap "+"/"-" or swipe the slider bar.

3 **Touch** 🔥.
   Cooking will start.
   The time in the display window will count down.

**Note:**
The oven will beep during the total defrosting time. This indicates that food should be turned, broken apart or removed. After attending to food, close door and touch **Start** to resume defrosting.

**Defrost on Micro Power by Time Setting**
This feature allows you to defrost meat, poultry and seafood by 300 W and time.

1 **Touch** 🔊 once.
   Touch to select “Micro Power”.

2 **To select 300 W.**
   Select 300 W by tap "+"/"-" or swipe the slider bar. " afterward appears in the display window.

3 **Touch** 🔔 once.
   Touch the Set key to verify your selection Micro Power level.

4 **To select the defrosting time.**
   Select the cooking time by tap "+"/"-" or swipe the slider bar. (Up to 90 minutes)

5 **Touch** 🔴.
   Defrosting will start.
   The time in the display window will count down.
Defrosting Tips and Techniques

**Preparation for Freezing:**
1. Heavy-duty plastic wraps, bags and freezer wrap are suitable.
2. Freeze meats, poultry and fish in packages with only 1 or 2 layers of food. To aid in separating layers, place two pieces of wax paper between them.
3. REMOVE ALL AIR and seal securely.
4. LABEL package with type and cut of meat, date and weight.
5. Defrosting times given in the charts are for thoroughly frozen foods (i.e. at least 24 hours in freezer maintained at -18 °C or lower).

**Defrosting Technique:**
1. Remove from wrapper and set on a defrosting rack in a dish on flat table.
2. On Turbo Defrost, the oven will beep during the defrosting time. At “beep”, turn over all meat, poultry, fish and shellfish. Break apart stewing meat, chicken pieces and minced meat. Separate chops and hamburger patties. Shield thin ends of roasts, poultry legs and wings, fat or bones with foil.
3. Throughout the defrosting time, remove any defrosted portions of mince or cubed meat, etc.
4. After defrosting, large roasts may still be icy in the centre. Let stand, 15 to 30 minutes, in refrigerator to complete defrosting.

To Cook on Convection by Time Setting

The oven can be used as a conventional oven using the CONVECTION mode which incorporates a heating element with a fan.

Without Preheating:

1 Touch \( \bigcirc \) once.

Touch to select “Convection”.

2 To select desired temperature. (40 °C, 100 °C ~ 230 °C)

Select temperature by tap “+”/-” or swipe the slider bar.
The oven offer a choice of convection temperatures 40 °C and 100 °C ~ 230 °C in 10 °C increments.
For quick selection of the most commonly used cooking temperatures, the temperatures start at 150 °C.
Temperature 40 °C is suitable for proving yeast dough. Temperature from 100 to 230 °C is especially suitable for cooking cake and pizza.

3 Touch \( \bigcirc \) once.

Touch the Set key to verify your desired temperature.

4 To select the cooking time.

Select the cooking time by tap “+”/-” or swipe the slider bar. (Up to 9 hours.)

5 Touch \( \bigcirc \).

Cooking will start.
The time in the display window will count down.

Notes:
1. You can change the cooking time during cooking if required. Tap “+”/-” to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes. Tapping “-” to zero will end cooking. It is not possible to adjust time by swiping the slider during cooking.
2. After touching Start, the selected temperature can be recalled and changed. Touch Convection key once to indicate the temperature in the display window. While the temperature is recalled in the display window, you can change the temperature (except 40 °C) by tapping “+”/-”.

Use of Accessory
It is possible to cook on one or two levels when using convection cooking.
When cooking on one level, please put recommended accessories directly in higher or lower shelf position.
When cooking on two levels, please put the metal tray in the lower shelf position and the grill tray in the higher shelf position.
To Cook on Convection by Time Setting (continued)

For best results always place food in a preheated oven.

With Preheating:

1. Touch once
   Touch to select “Convection”.

2. To select desired temperature. (100 °C~230 °C)
   Select temperature by tap “+”/”-” or swipe the slider bar.
   The oven offer a choice of convection temperatures 100 °C ~ 230 °C in 10 °C increments.

1. The maximum time for cooking in this mode is 30 minutes. If required to cook for longer than this time, re-fill the water tank and repeat the above operation for the remaining time.
2. If during operation the water tank becomes empty, the oven will stop operation. The prompt in the display will ask you to re-fill the water tank. After re-filling the water tank and positioning back in the oven, touch Start. The oven will not continue cooking until the water tank has been re-filled and Start touched.
3. You can change the cooking time during cooking if required. Tap “+/-” to increase or decrease the cooking time. Time can be increased/decreased in 1 minute increments, up to 10 minutes. Tapping “-” to zero will end cooking. It is not possible to adjust time by swiping the slider during cooking.
4. It may be necessary to wipe the excess water in the cavity after Steam cooking.

Use of Accessory
When cooking by 300 W + Steam mode with the plastic trivet, place it inside the glass shelf in the middle shelf position, or you can put food in the dish inside the glass shelf in higher shelf position according to the height of food. Food can be placed directly on the plastic trivet.
Use oven gloves when removing accessories as they will be very hot, and so will the roof and walls of the oven.

### Steam Shot Setting

This feature allows you add steam during cooking (up to 3 minutes). Adding steam during cooking enhances heat distribution and aids the rising process of breads, cakes and pastries. There are four combinations that you can use steam shot - microwave, grill, crispy grill and convection.

Set and operate the desired program.

As required during operation, hold steam for 2 seconds and 1 minute steam will be added.

If you want to add 2 or 3 minutes, tap Steam key once or twice within 3 seconds after step 2.

**Notes:**
1. Steam shot is not available during preheating mode.
2. Fill the water tank before use.
3. The original program still counts down when operating steam shot.
4. The steam shot time cannot exceed the remaining cooking time.
5. If adding 2 or 3 minutes, steam must be tapped 2 or 3 times within a 3 second time period.

**Example to use:**

### Guidelines for Steam Setting

**Guidelines**
1. There is no microwave power on the STEAM only program.
2. Use the accessories provided, as explained above.
3. The STEAM will only operate with the oven door closed.
4. **DURING AND AFTER COOKING WITH STEAM FUNCTION, DO NOT OPEN THE OVEN DOOR WHEN YOUR FACE IS VERY CLOSE TO THE OVEN. CARE MUST BE TAKEN WHEN OPENING THE DOOR AS STEAM MAY CAUSE INJURY.**
5. **ALWAYS USE OVEN GLOVES WHEN REMOVING THE FOOD AND ACCESSORIES AFTER STEAMING AS THE OVEN AND ACCESSORIES WILL BE VERY HOT.**
6. After each steam operation carefully remove the drip tray from the front of the oven. Gently ease forwards, holding with both hands. After emptying, wash in warm soapy water. To re-position, click back into position on the oven legs. (See page 9)

### CAUTIONS

**THE ACCESSORIES AND SURROUNDING OVEN WILL GET VERY HOT. USE OVEN GLOVES.**

**WHEN REMOVING THE FOOD OR COOKING ACCESSORIES, HOT WATER MAY DRIP FROM THE OVEN TOP.**

**STEAM MAY BILLOW OUT WHEN YOU OPEN THE DOOR. IF THERE IS STEAM IN THE OVEN, DO NOT REACH IN WITH YOUR BARE HANDS! RISK OF BURNS! USE OVEN GLOVES.**

**TAKE CARE WHEN REMOVING THE DRIP TRAY. WIPE ANY WATER THAT DRIPS FROM THE LEFT SIDE OF THE OVEN. THIS IS NORMAL.**

3-Stages Setting

This feature allows you to program 3 Stages of cooking continuously.

E.g.: Continually set [600 W] 2 minutes, [Steam 2] 3 minutes and [Grill 3] 10 minutes.

1. Touch to select Micro Power
2. Tap "+"/"-" or swipe the slider bar to select 600 W.
3. Touch the Set key to verify your desired power level.
4. Tap "+"/"-" or swipe the slider bar to set 2 minutes.
5. Touch to select Steam.
6. Tap "+"/"-" or swipe the slider bar to select steam 2.
7. Touch the Set key to verify your desired power level.
8. Tap "+"/"-" or swipe the slider bar to set 3 minutes.
9. Touch to select Grill.
10. Tap "+"/"-" or swipe the slider bar to select Grill 3.
11. Touch the Set key to verify your desired power level.
12. Tap "+"/"-" or swipe the slider bar to set 10 minutes.
13. Touch once. The time will count down at the first stage in the display window.

</tbody>
</table>

NOTES:
1. When operating, two beeps will sound between each stage.
2. This feature is only available for Microwave, Grill, Timer, Convection, Steam and 300 W + Steam function.
3. Steam and 300 W + Steam function can not be used over 30 minutes in this feature.
4. Auto Control function can not be used in this feature.
To Cook using the Recipe Store

This feature allows you to pre-program your oven for regular reheating or cooking tasks. You are able to preprogram your oven for a specific power level and time that is convenient for you. You are able to preprogram three memory tasks.

To Set a Recipe Program:

1 Touch 🍛 Once.

2 Select Memory number 1-3.

   - Tapping “+”/-” or swipe the slider bar until the desired memory number appears in the display window.

3 Touch ⬅️ once.

   Touch the Set key to verify your selection Recipe number.

4 Set the desired cooking programme.

Recipe Store can store 3 stages cooking. (refer to 28)

5 Touch ⬅️ once.

   Touch the Set key to verify the selection. Memory number appears in the display window.

To Start Recipe Store Program:

1 Touch 🍛 Once.

   The menu appears in the display window.

2 Select Memory number 1-3.

   - Tapping “+”/-” or swipe the slider bar until the desired memory number appears in the display window.

3 Touch ⬅️ once.

   Touch the Set key to verify the desired recipe program.

4 Touch ⚡ once.

   Cooking will start. The time in the display window will count down.

NOTES:
1. This feature is only available for Microwave, Grill, Timer, Crispy grill, Convection, Steam, Steam plus and 300 W + Steam function.
2. Convection and Steam plus pre-heat mode cannot be programmed into Recipe Store.
3. Recipe Store can store 3 stages cooking. But it only can store 1 stage for crispy grill and steam plus.
4. Maximum cooking time of recipe store is 9 hours.
5. To reset recipe program, repeat “To Set a Recipe Program” steps 1-5.
6. A new recipe program will cancel the recipe program previously stored.
7. Auto Control function can not be used in this feature.
To Cook Food Using Sensor Reheat/Cook

Sensor Reheat/Cook allows you to cook foods without selecting times and power levels. The sensor detects the heat and humidity generated by the food and cooks your food automatically. Place food into an appropriate sized dish for the volume of food you are cooking. Cover securely with plastic wrap or a securely fitting lid (do not use any snap closing lids). Plastic dishes are not suitable as a secure seal cannot be achieved and inaccurate cooking may result.

1 **Touch** Once.

2 **Select desired menu.**

   ![Slide Bar](image)

   Tapping “+”/”-” or swipe the slider bar until the desired menu appears in the display window.

   (see below chart).

<table>
<thead>
<tr>
<th>Menu</th>

</tr>
</tbody>
</table>

   **Note:**

   If you are satisfied with the result of the SENSOR Reheat/Cook programme, please skip to step 5.

3 **Touch** Once.

   Touch the Set key to verify the selection.

4 **Adjust to Taste.**

   ![Slide Bar](image)

Preferences for degree of cooking vary for each individual. After having used auto sensor programs a few times, you may decide you would prefer your food cooked to a different degree of cooking. By using “+”/”-” the programs can be adjusted to cook food for a longer or shorter time. After selecting the sensor program, tap “+”/”-” or swipe the slider bar before touching Start. The oven will automatically cook the food 10% more or 10% less.

5 **Touch** Once.

Do not stop the oven or open the door during this part of the cooking stage as inaccurate cooking may result. After the heat humidity is detected by the SENSOR, the remaining time appears in the display window and begins to count down.

**NOTES:**

1. If the temperature of the cavity is high, sensor cook/reheat feature can not be used. display window will display “HOT”. Sensor Reheat/Cook feature can not be used until the “HOT” disappears.
2. When you select an automatic program symbols will appear in the display to show the cooking mode that will be used and the accessories that are needed.
3. Cook according to the cooking method on the next page.
To Cook Food Using **Sensor Reheat/Cook** (continued)

1. **Sensor Reheat** (uses microwave only)
Reheating by Sensor is suitable for pre-cooked foods. There is a setting for frozen and refrigerator temperature or room temperature foods. It is suitable for casseroles, plated meals, soup, stews, pasta dishes (except lasagna) and canned foods. Do not reheat bread or pastry products, raw, uncooked food or beverages on Sensor Reheat. Foods greater than 1 kg or smaller than 125 g should be cooked by micro power and time. Put food into suitable container, add 1-3 tablespoon water and cover foods securely with plastic wrap. During the heating time, the oven will 'beep' and prompt you to stir the food. There is no need to recover if not required. After heating, stir the food, check it is hot and allow standing for 2 to 3 minutes.

2. **Dried Pasta** (uses microwave only)
Suitable for cooking dried pasta such as spaghetti, fettuccine, macaroni, penne, spiral and various pasta shapes. Place pasta in an appropriate size dish with boiling water.
Use the following as a guide:

<table>
<thead>
<tr>
<th>Pasta Qty</th>
<th>Boiling Water</th>
<th>Dish size</th>
</tr>
</thead>
<tbody>
<tr>
<td>125 g</td>
<td>1 L</td>
<td>3 litres</td>
</tr>
<tr>
<td>250 g</td>
<td>1.3 L</td>
<td>3 litres</td>
</tr>
<tr>
<td>350 g</td>
<td>1.6 L</td>
<td>4 litres</td>
</tr>
<tr>
<td>500 g</td>
<td>2 L</td>
<td>4 litres</td>
</tr>
</tbody>
</table>

Add 1 tablespoon of oil, if desired, before cooking to prevent pasta from sticking together. Cover securely with a well fitting lid. During cooking, the oven will 'beep' and instruct you to stir and remove cover. At the end of the cooking time, cover and let stand for 5 to 10 minutes, if required, before draining.

3. **Fresh Pasta** (uses microwave only)
Suitable for cooking fresh pasta such as fettuccine, tagliatelle, tortellini, ravioli and agnolotti. (Gnocchi should be cooked by manual MICRO POWER.) Place pasta in an appropriate size dish with boiling water. Use the below chart as a guide:

<table>
<thead>
<tr>
<th>Pasta Qty</th>
<th>Boiling Water</th>
<th>Dish size</th>
</tr>
</thead>
<tbody>
<tr>
<td>200 g</td>
<td>1 litre</td>
<td>3 litres</td>
</tr>
<tr>
<td>400 g</td>
<td>1.25 litres</td>
<td>3 litres</td>
</tr>
<tr>
<td>600 g</td>
<td>2.0 litres</td>
<td>3.5 litres</td>
</tr>
<tr>
<td>800 g</td>
<td>2.5 litres</td>
<td>4 litres</td>
</tr>
</tbody>
</table>

Add 1 tablespoon of oil, if desired, before cooking to prevent pasta from sticking together. Cover dish securely with a well fitting lid. During cooking, the oven will 'beep' and instruct you to stir and remove cover. At the end of the cooking time, cover and let stand for 5 to 10 minutes, if required, before draining.

4. **Casserole** (uses microwave only)
Suitable for cooking casserole with less tender cut soft meat combined with liquid and vegetables. Cut meat and vegetables into even size pieces. Place in a suitable size dish. Dish should be approximately ¾ full. Do not use plastic dishes as incorrect cooking time may result.
Use the below chart as a guide:

<table>
<thead>
<tr>
<th>Total Weight</th>
<th>Meat Qty</th>
<th>Vegetable Qty</th>
<th>Stock Liquid Qty</th>
</tr>
</thead>
<tbody>
<tr>
<td>800 g</td>
<td>400 g</td>
<td>200 g</td>
<td>200 ml</td>
</tr>
<tr>
<td>1200 g</td>
<td>600 g</td>
<td>300 g</td>
<td>300 ml</td>
</tr>
<tr>
<td>1600 g</td>
<td>800 g</td>
<td>400 g</td>
<td>400 ml</td>
</tr>
<tr>
<td>2000 g</td>
<td>1000 g</td>
<td>500 g</td>
<td>500 ml</td>
</tr>
</tbody>
</table>

Cover securely with a well fitting lid. During the cooking time, the oven will 'beep' and instruct you to stir. At the end of cooking time, allow the casserole to stand for 5 to 10 minutes.

**Note**: total weight equals weight of meat plus vegetables plus liquid.

5. **Jacket Potato** (uses microwave + convection)
Suitable for cooking whole potatoes with their skin left on. Choose medium sized potatoes weighing approximately 200-250 g each. Wash and scrub potatoes and dry well. Prick with a fork several times. Brush with oil and sprinkle with salt. Place on glass shelf in middle shelf position. At the end of cooking time, allow the potato to stand for 5 to 10 minutes.
To Cook Food Using Steam Cook

There are 2 ways for you to steam some of your favourite foods by setting the weight only. One is steam only, the other is microwave with steam. Steam with microwave mode saves cooking time. The oven determines the power and the cooking time automatically. Select the category and set the weight of the food. The weight is programmed in grams.

1 Touch \( \text{Once} \).

2 Select desired menu.

Tapping “+”/“-” or swipe the slider bar until the desired menu appears in the display window. Please see the chart on next page.

Notes:
When you select an automatic program symbols will appear in the display to show the cooking mode that will be used and the accessories that are needed.
For example (Boiled potatoes):

Steam only

Steam with microwave

3 Touch \( \text{Once} \).

Touch the Set key to verify the selection.

4 Select desired weight.

Tapping “+”/“-” or swipe the slider bar until the desired weight appears in the display window.

5 Touch \( \text{Once} \).

The cooking time appears in the display window and begins to count down.

NOTE:
1. For larger weights on the auto programs rice, it will be necessary to re-fill the water tank during cooking.
2. Do not cover foods on the auto steam programs.
3. Most foods benefit from a STANDING time after cooking on an auto program, to allow heat to continue conducting to the centre.
4. To allow for some variations that occur in food, check that food is thoroughly cooked and piping hot before serving.
5. Cook according to the cooking method on page 34.

**NOTE:**
1. * Preheat is necessary.
2. When you select an automatic program symbols will appear in the display to show the cooking mode that will be used and the accessories that are needed.
3. If the temperature of the cavity is so high, auto cook feature can not be used. Display window will appear "HOT". Auto Cook feature can be used until the "HOT" disappears.
4. Cook according to the guideline on next page.
5. When you use Econavi, please put your food as below picture:

Put the food on the shadow area

#### Working principle of ECONAVI in Auto Menu:
By means of top heater and microwave power combined, to supply concentrated heat efficiently on food (which placed in the front row of the grill tray). It can help you save time and energy. That’s how ECONAVI works.
- Heating area refers to efficient working area at the ahead of the grill tray available for two serves.
- ECONAVI indicator lamp will light up as soon as cooking begins.
- Energy saving effect will vary depending on the food category, amount, and placement.
22. Grill Chicken Pieces (uses crispy grill)
Suitable for most cuts of chicken pieces. Each chicken pieces should weigh between 100-250 g each. Brush with oil and sprinkle with salt. Place chicken pieces on grill tray in middle shelf position. Select Auto Menu Grill Chicken Pieces, then select the weight of the food, then touch Start. Do not use plastic wrap or lid.

Note:
When you use Econavi, please put food on the shadow area. Please refer to page 37.

23. BBQ Meat Pieces (uses crispy grill)
Allow you to roast meat skewer, chicken pieces or seafood. Place marinated meat pieces on grill tray in the middle shelf position. Select Auto Menu BBQ Meat Pieces, then select the weight of the food, then touch Start. Do not use plastic or lid.

Note:
When you use Econavi, please put food on the shadow area. Please refer to page 37.

24. Roast Chicken
(uses microwave + convection)
Use for roasting whole chickens that are unstuffed. Wash and dry chicken, truss or tie legs. Brush the surface of the skin with butter or oil and sprinkle with seasoning if desired. Place chicken back-side down on glass tray in the lower shelf position. During the cooking time, the oven will ‘beep’ and prompt you to turn over. Select Auto menu Roast Chicken, then select the weight closest to the actual weight of the chicken, and then touch Start. Do not use plastic wrap or lid.

Note:
small sized chickens with stuffing can be cooked using the setting one weight higher than the actual weight. For example. To cook a 1300 g chicken that has stuffing, use the 1500 g setting even though the total weight of the chicken with stuffing is 1300 g.

25. Roast Beef (uses convection only)
Suitable for roasting joints of beef such as rump, bolar, fillet, topside, rib eye. Choose roasting pieces that are even in shape and if boneless have been rolled and tied. Brush with oil and seasonings. Place fat side up on glass shelf in the lower shelf position. Select Auto menu Roast Beef then select the weight closest to the weight of the piece, and then touch Start. Do not use plastic wrap or lid.

26. Roast Lamb (uses convection only)
Suitable for roasting joints of lamb, legs, boned and rolled loin, rack of lamb and shoulder roasts. Brush roast with oil and seasonings. Place fat side up on glass shelf in the lower shelf position. Select Auto Menu Roast Lamb, then select the weight closest to the weight of the piece, and then touch Start. Do not use plastic wrap or lid.

27. Roast Pork (uses microwave + convection)
Suitable for roasting joints of pork, leg, boned and rolled loin, rib roast and shoulder. Score rind, brush with lemon juice and rub liberally with salt. Place roast rind side up on glass shelf in the lower position . Select Auto menu Roast Pork , then select the weight closest to the weight of the meat . and then touch Start. Do not use plastic wrap or lid.

28. Fresh Pizza (uses convection + grill)
Use for cooking fresh pizza either purchased or home made.
Select Auto Menu Fresh Pizza, then select the weight of the pizza (total weight of base plus topping ingredients). See chart below for quantities.

Touch Start to preheat the oven. Place assembled pizza on the metal tray. When the oven is preheated, place the metal tray in the higher shelf position. Close door and touch Start.

29. Frozen Pizza (uses crispy grill)
Allow you to bake frozen pizza. Place pizza on grill tray in the middle shelf position. Select Auto Menu Frozen Pizza, then select the weight of the pizza (total weight of base plus topping ingredients). Touch Start. Do not use plastic wrap or lid.

Notes: No need to use aluminum foil or grease.

30. Fresh Crispy Top
(uses convection only)
Use for heating and crisping the top of foods like pasta bake, macaroni cheese, cottage pie and lasagna. All foods must be pre-cooked and cold. Transfer crispy top to a similar sized heat proof container. Select Auto menu Fresh Crispy Top then, select the weight of food. Touch Start to preheat the oven. Do not cover and place on metal tray in lower shelf position after preheated. Allow standing for 2 minutes. Ensure food is hot before consuming.
31. Frozen Crispy Top (uses convection only)
Use for heating and browning the top of frozen purchased savoury dishes like macaroni cheese, shepherd’s pie and lasagna. All foods must be pre-cooked and frozen. Transfer crispy top to a similar sized heatproof container. Select Auto menu Frozen Crispy Top then select the weight of food. Touch start to preheat the oven. Do not cover and place it on metal tray in the lower shelf position after preheated. Allow standing for 2 minutes. Ensure food is hot before consuming.

32. Fruit Poached (uses microwave only)
Use for cooking fruits that would usually be stewed or poached. Suitable for fruits such as rhubarb, apples, stone fruits, pears, figs, pineapple, kiwi fruit and berries. Trim and cut fruit into even sized pieces. Place into a microwave safe container. See chart below for quantities.

Spoon jam into bottom of pudding bowl. Cream butter and sugar in a separate bowl until light and fluffy. Add eggs (one at a time), beating well after each addition. Fold in flour alternately with milk. Mix until well combined. Pour mixture over jam. Smooth top and place pudding bowl onto the base of the oven. Select Auto Menu Sponge Pudding, then select the number of serves, and then touch Start. Allow standing for 5 minutes before turning out.

34. Muffins (uses convection only)

**Ingredients:**
- muffin cups: 12
- egg: 50 g
- melted butter: 80 g
- milk: 120 ml
- sugar: 60 g
- self raising flour: 200 g
- baking powder: 12 g
- Salt: ½ teaspoon
- dry fruit: 50 g

**Method:**
Whisk eggs in a mixing bowl, next add milk and butter and mix well. Leave aside. Sift sugar, flour, baking powder and salt in a mixing bowl, and make a well in the centre. Stir in milk mixture and dry fruit. Leave aside for about ½ hour. Touch Start to preheat the oven. Scoop batter into muffin cup (⅗ cup), place muffin on metal tray in lower shelf position after preheated. Allow standing for 2 minutes. Ensure food is hot before consuming.

35. Cookie 1 Level (uses convection only)

**Ingredient:**
- Egg: 35 g
- Plain flour: 120 g
- Butter: 60 g (room temperature)
- Castor sugar: 60 g
- vanilla essence

**Method:**
Whisk the butter and sugar to be softened and creamy with egg beater. Add beaten eggs and vanilla essence and stir evenly. Gradually add sifted plain flour and stir evenly with wooden spoon. Select the program and touch Start key to preheat. Place the aluminum foil on the metal tray. Cut the mixture to cookie shape with 5 mm height and 13 g each and arrange into 4×5. After preheating, three beeps will be heard. Put the metal tray on the lower shelves quickly and touch Start key.

**Notes:**
1. Insure the butter be soft under room temperature in advance.
2. Put the ingredients in a deep container to avoid splash when whisking.
3. Arrange the cookies equidistantly and under specified volume for a better performance.
4. After preheating, place the metal tray on the lower shelves immediately. If the door is opened too long, it will affect the cooking result.
36. **Cookie 2 Levels** (uses convection only)

**Ingredient:**
- Egg: 75 g
- Plain flour: 240 g
- Butter: 120 g (room temperature)
- Castor sugar: 120 g
- Vanilla essence

**Method:**
Whisk the butter and sugar to be softened and creamy with egg beater. Add beaten eggs and vanilla essence and stir evenly. Gradually add sifted plain flour and stir evenly with wooden spoon. Select the program and touch Start key to preheat. Place the aluminum foil on the metal tray and grill tray. Cut the mixture to cookie shape with 5 mm height and 13 g each and arrange into 4×5. After preheating, three beeps will be heard. Put the metal tray on the lower shelf position and grill tray on the higher shelf position quickly and touch Start key.

**Notes:**
1. Insure the butter be soft under room temperature in advance.
2. Put the ingredients in a deep container to avoid splash when whisking.
3. Arrange the cookies equidistantly and under specified volume for a better performance.
4. After preheating, place the metal tray on the lower shelves immediately. If the door is opened too long, it will affect the cooking result.

37. **Frozen Potato Fries** (uses crispy grill only)

Use for cooking frozen pre-cooked potato products like wedges, chips, gems, etc.

Select frozen potato fries, then select the weight of the food. Spread the frozen product in a single layer onto the grill tray place the grill tray onto the middle shelf position. Close door and touch Start.

**Note:**
When you use Econavi, please put food on the shadow area. Please refer to page 37.

38. **Fried Chicken** (uses crispy grill)

Lay out prepared chicken on grill tray in middle shelf position. Select Fried Chicken and touch Start key.

**Note:**
When you use Econavi, please put food on the shadow area.

39. **Melt Butter** (uses microwave only)

Remove wrapper, cut butter into 2 tbsp cube, and place into a microwave safe dish. Melt with lid or plastic wrap. Stir after cooking. If food needs more time cooking or weight exceeds range, cook using 300 W for melting.

40. **Melt Chocolate** (uses microwave only)

Remove wrapper and place chocolate into a microwave safe dish. Cook without cover. During the cooking time, the oven will ‘beep’ and prompt you to stir. After heating, stir until completely melted. If food needs more time cooking or weight exceeds range, cook using 300 W for melting.

**Note:** Chocolate holds its shape even when softened.

41. **Soften Ice Cream** (uses microwave only)

Remove wrapper and place in a microwave safe bowl/dish. Soften without cover. If food needs more time cooking or weight exceeds range, cook using 300 W for melting and softening. If food needs more time cooking or weight exceeds range, cook using 300 W for softening.

42. **Soften Cream Cheese** (uses microwave only)

Soften slightly without lid. If food needs more time cooking or weight exceeds range, cook using 300 W for melting and softening. If food needs more time cooking or weight exceeds range, cook using 300 W for softening.
Cleaning Setting

Deodorization:
This feature is suitable for cleaning the particular smell from the microwave oven. (30 minutes is needed)

1 Touch once.

2 Select “Deodorization”.

Tapping “+”/“-” or swipe the slider bar until “Deodorization” appears in the display window.

3 Touch once.

Touch the Set key to verify the selection.

4 Touch.

The cooking time appears in the display window and begins to count down.

Drain water:
Water is pumped through the system to clean the pipes. The water is drained into the drip tray.

1 Add 100 g of water to the water tank. Ensure drip tray is empty.

2 Touch once.

3 Select “Drain water”.

Tapping “+”/“-” or swipe the slider bar until “Drain water” appears in the display window.

4 Touch once.

Touch the Set key to verify the selection.

5 Touch.

The cooking time appears in the display window and begins to count down.

NOTE:
1. Only run this program with 100 g of water in the tank.
2. Do not remove the drip tray during the drain water program. If the drip tray is removed during the program, U12 is displayed and the program will stop.
3. Empty the drip tray and rinse with running water after the program has finished.

CAUTION:
If the Drain water program is used directly after a steam cooking program, hot water may be drained into the drip tray.
Cleaning Setting (continued)

System cleaning
The first stage of this program cleans the system with a citric acid solution. The second stage runs water through the system to rinse the pipes.

1 **Make a solution of 16 g citric acid and 200 g of water, add the solution to the water tank. Ensure drip tray is empty.**

2 **Touch once.**

3 **Select “System cleaning”.**

   ![+/- slider](image)

   Tapping “+” or “-” or swipe the slider bar until “system cleaning” appears in the display window.

4 **Touch once.**

   Touch the Set key to verify the selection.

5 **Touch .**

   The cooking time appears in the display window and begins to count down. The program will run for approx. 29 minutes.

6 **After the program has paused, empty the drip tray and fill the steam tank with water (to max level).**

7 **Touch .**

   Touch Start. The program will run for approx. 1 minute. Empty the drip tray after the program has finished.

**Notes:**
1. When appears in the display, run the ‘system cleaning’ program.
2. If the system cleaning program is not used regularly, the pipe will get blocked and the steaming performance will be less effective.
3. Do not remove the drip tray during the drain program. If the drip tray is removed during the program, U12 is displayed and the program will stop.
4. Empty the drip tray and rinse with running tap water after the program has finished.

All recipes are tested using standard measurement that appear in the above chart.
To Use Timer

This feature allows you to program standing after cooking is completed and to program the oven as a minute or 10 seconds timer or program delay start.

To Use as a Kitchen Timer.

Touch once. Set desired amount of time. (up to 90 minutes) Touch Start. Time will count down without oven operating.

To Set Standing Time.

Touch once. Set desired amount of standing time. (up to 90 minutes) Touch Start. Cooking will start. After cooking, standing time will count down without oven operating.

To Set Delay Start.

Touch once. Set desired amount of delay time. (up to 90 minutes) Touch Start. Delayed time will count down without oven operating. Then cooking will start.

NOTES:
1. If oven door is opened during the Standing Time, Delay Start or Kitchen Timer, the time in the display window will continue to count down.
2. Delay Start/Standing Time cannot be programmed before/after any Auto Control function. This is to prevent the standing temperature of the food from rising before defrosting or cooking begins. A change in the starting temperature could cause inaccurate results and/or food may deteriorate.
3. When using Standing time or Delay Start, it’s up to 2 power stages.
Care of your Microwave Oven

Turn the oven off and remove the power plug from the wall socket before cleaning.

The outside oven surfaces should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.

Always clean the flat table after cooling down with a mild detergent and wipe to dry.

Keep the inside of the oven clean. When food splatters or spilled liquids adhere to oven walls, wipe with a damp cloth. Mild detergent may be used if the oven gets very dirty. The use of harsh detergent or abrasives is not recommended.

Do not allow the Control Panel to become wet. Clean with a soft, damp cloth. Do not use detergents, abrasives or spray on cleaners on the Control Panel. After cleaning touch Stop/Reset key to clear display window.

If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity conditions and in no way indicates malfunction of the unit.

Do not use harsh abrasive cleaners or sharp metal scrapers to clean the oven door glass since they can scratch the surface, which may result in shattering of the glass.

After using, clean it with a mild detergent or dishwasher.

Notes:
1. When using the Grill, Convection or cooking in the crispy grill mode, some foods may inevitably splatter grease on to the oven walls. If the oven is not cleaned, occasionally it may start to “smoke” during use. These marks will be more difficult to clean later.
2. After Grill, Convection or crispy grill cooking the ceiling and walls of the oven should be cleaned with a soft cloth squeezed in soapy water. Particular care should be taken to keep the window area clean particularly after cooking by Grill, Convection or crispy grill. Stubborn spots inside the oven can be removed by using a small amount of microwave oven cleaner sprayed onto a soft damp cloth. Wipe onto problem spots, leave for recommended time and then wipe off. This method can not be used to clean the oven door.

DO NOT SPRAY DIRECTLY INSIDE THE OVEN.
A steam cleaner is not to be used for cleaning.

3. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect the life of the appliance and possibly result in a hazardous situation.
4. When it becomes necessary to replace the oven light, please consult the service center specified by Panasonic.

Grill tray Glass shelf Trivet Metal tray Drip tray

1. Always keep the drip tray clean.
2. Clean and wipe dry after use.
3. After cleaning, re-connect the drip tray to the plastic feet.
4. DO NOT USE A DISHWASHER TO CLEAN THE DRIP TRAY.
Cleaning the water tank

Clean with a soft sponge in water.

Remove the water tank and clean the compartment where the water tank is inserted.

Open the water supply cap, remove the lid and pipe cap and clean.

If the pipe cap is difficult to remove, wiggle from side to side. When re-fitting, make sure that the pipe faces down (see diagram).

The rubber seal and front of the tank can also be removed for cleaning.

Removing the rubber seal

Ensure that the rubber seal is not inside out when re-fitting. If the seal is not fitted correctly the lid will not close securely and it will leak.

Removing the front cover

1. Lightly twist the cover until the far side unclips.
2. Continue to twist until the near side unclips.

Re-fitting the front cover

1. Align the slots on the cover with the holes on the tank.
2. Insert and push down until it clicks.

Notes:
1. Clean the water tank at least once a week to prevent build up of limescale.
2. Do not use a dishwasher to clean the water tank or parts of the water tank.

Panasonic Warranty (for Australia)

Home Appliance 12 Month Warranty from Date of Purchase

1. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period. For Communications products (i.e. Cordless Phones, etc) the genuine battery(s) has a 3 month warranty.

2. This warranty only applies to Panasonic products purchased in Australia and sold by Panasonic Australia or its Authorised Distributors or Dealers and only where the products are used and serviced within Australia or it’s territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer’s recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only (also Clip & Trim Professional use) and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:

   (a) Cabinet Parts
   (b) Microwave Oven Plates.
   (c) User replaceable Batteries
   (d) Kneader Mounting Shaft, Shaver Heads, Cutters, Foils, Blades
   (e) Accessories
   (f) Noise or vibration that is considered normal

5. To claim warranty service, when required, you should:
   • Contact Panasonic’s Customer Care Centre on 132600
   • Send or take the product to a Panasonic Authorised Service Centre together with your purchase receipt as a proof of purchase date. Please note that freight and insurance to and / or from your nearest Authorised Service Centre must be arranged by you.

6. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, de-installation or re-installation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of Australia, however, coverage will vary dependant on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 132600.

In addition to your rights under this warranty, Panasonic products come with consumer guarantees that cannot be excluded under the Australian Consumer Law. If there is a major failure with the product, you can reject the product and elect to have a refund or to have the product replaced or if you wish you may elect to keep the goods and be compensated for the drop in value of the goods. You are also entitled to have the product repaired or replaced if the product fails to be of acceptable quality and the failure does not amount to a major failure.

If there is a major failure in regard to the product which cannot be remedied then you must notify us within a reasonable period by contacting the Panasonic Customer Care Centre. If the failure in the product is not a major failure then Panasonic may choose to repair or replace the product and will do so in a reasonable period of time from receiving notice from you.

THIS WARRANTY CARD AND THE PURCHASE DOCKET (OR SIMILAR PROOF OF PURCHASE) SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

If you require assistance regarding warranty conditions or any other enquiries, please visit the Panasonic Australia website www.panasonic.com.au or contact by phone on 132 600

Panasonic Warranty (for New Zealand)

Home Appliance 12 Month Warranty from Date of Purchase

1. Subject to the conditions of this warranty Panasonic or its Authorised Service Centre will perform necessary service on the product without charge for parts or labour, if in the opinion of Panasonic, the product is found to be faulty within the warranty period. For Line Communications products (i.e. Cordless Phones, etc) the genuine battery(s) has a 3 month warranty.

2. This warranty only applies to Panasonic products purchased in New Zealand and sold by Panasonic New Zealand or its Authorised Distributors or Dealers and only where the products are used and serviced within New Zealand or its territories. Warranty cover only applies to service carried out by a Panasonic Authorised Service Centre and only if valid proof of purchase is presented when warranty service is requested.

3. This warranty only applies if the product has been installed and used in accordance with the manufacturer's recommendations (as noted in the operating instructions) under normal use and reasonable care (in the opinion of Panasonic). The warranty covers normal domestic use only (also Clip & Trim Professional use) and does not cover damage, malfunction or failure resulting from use of incorrect voltages, incorrect installation, accident, misuse, neglect, build-up of dirt or dust, abuse, maladjustment of customer controls, mains supply problems, thunderstorm activity, infestation by insects or vermin, tampering or repair by unauthorised persons (including unauthorised alterations), exposure to abnormally corrosive conditions or any foreign object or matter having entered the product.

4. This warranty does not cover the following items unless the fault or defect existed at the time of purchase:
   (a) Cabinet Parts
   (b) Microwave Oven cook plates.
   (c) User replaceable Batteries
   (d) Kneader mounting shaft unit and
      Heads, Cutters, Foils, Blades and other accessories.
   (e) Noise or vibration that is considered normal

5. To claim warranty service, when required, you should:
   • Telephone Panasonic’s Customer Care Centre on 09 2720178 or visit our website referred to below and use the Service Centre Locator for the name/address of the nearest Authorised Service Centre.
   • Send or take the product to a Panasonic Authorised Service Centre together with your proof of purchase receipt as a proof of purchase date. Please note that freight and insurance to and from your nearest Authorised Service Centre must be arranged by you.

6. The warranties hereby conferred do not extend to, and exclude, any costs associated with the installation, deinstallation or reinstallation of a product, including costs related to the mounting, de-mounting or remounting of any screen, (and any other ancillary activities), delivery, handling, freighting, transportation or insurance of the product or any part thereof or replacement of and do not extend to, and exclude, any damage or loss occurring by reason of, during, associated with, or related to such installation, de-installation, re-installation or transit.

Panasonic Authorised Service Centres are located in major metropolitan areas and most regional centres of New Zealand, however, coverage will vary dependent on product. For advice on exact Authorised Service Centre locations for your product, please telephone our Customer Care Centre on 09 2720178 or visit our website and use the Service Centre Locator.

Unless otherwise specified to the consumer the benefits conferred by this express warranty are additional to all other conditions, warranties, guarantees, rights and remedies expressed or implied by the Consumer Guarantees Act of New Zealand and all other obligations and liabilities on the part of the manufacturer or supplier and nothing contained herein shall restrict or modify such rights, remedies, obligations and liabilities.

Microwaves penetrate the surface of the food to a depth of about two to three centimetres and then the heat is gradually conducted in a random pattern. Some parts of food matter cook faster than others. Special microwave techniques are used to promote fast and even cooking. Some of these techniques are similar to those used in conventional cooking, but because microwaves produce heat very quickly these following techniques are extremely important. It's a must for you to be familiar with the following tips.

### Food Characteristics

#### Size and Quantity
Small portions cook faster than large portions. As you increase the quantity of food you put into the microwave oven, you must also increase your cooking time. The microwave oven has the same power regardless of quantity; thus the power is divided between more items and so it takes longer to cook. As a general guide, if you double the quantity of food suggested in the recipe, add half the time suggested again.

#### Liquid Content
Low moisture foods take a shorter time to cook than foods with a lot of moisture.

#### Shape
Uniform sizes cook more evenly. To compensate for irregular shapes, place thin pieces towards the centre of the dish and thicker pieces towards the outer edge of the dish.

#### Bone and Fat
Bones conduct heat and cause the meat next to them to be heated more quickly. Large amounts of fat absorb microwave energy and the meat next to these areas may overcook.

#### Starting Temperature
Food which has been sitting at room temperature takes less time to cook than refrigerated or frozen food.

#### Density and Composition
Porous, airy foods (cakes and breads) take less time to cook than heavy compacted foods (meat and vegetables). Recipes high in fat and sugar content cook more quickly.

### Techniques for Preparation

#### Timing
A range of cooking times is given in each recipe for two reasons. First, to allow for the uncontrollable differences in food shapes, starting temperatures and personal preferences. Secondly, these allow for the differences in electrical voltage input which changes during peak load periods. Always remember that it is easier to add time to undercooked food. Once the food is overcooked, nothing can be done. For each recipe, an approximate cooking time is given.

#### Stirring
Stirring is often necessary during microwave cooking. We have noted when stirring is helpful in the recipes. Always bring the outside edges towards the centre and the centre portions to the outside.

#### Rearranging or Turning
Some foods should be turned in the container during cooking. For example, because of the different thicknesses in the breast and back sections of poultry, it is a good idea to turn poultry over once to ensure more even cooking. Rearranging or turning over uneven shaped food in the dish should be done as suggested to ensure a satisfactory result. Rearrange small items such as chicken pieces, prawns, hamburger patties, steak or chops. Rearrange pieces from the centre to the edge of the dish.

#### Cooking in Layers
This microwave oven is not designed to cook more than 1 layer of food. Cooking in 2 layers may not always be successful, it takes longer and may be uneven. You can successfully reheat two dinner plates of food at one time but remember to increase the reheating time and use a microwave warming rack.

#### Piercing of Foods
Pierce the skin or membrane of foods such as whole potatoes when cooked whole in the microwave oven. This allows steam to escape. If the skin has not been pierced, food may burst.

#### Cured Meats
Cured meats may overcook in some areas due to the high concentration of salts used in the curing process. So take care when cooking different brands of bacon as cooking times may vary slightly.

#### Soups
Use a bowl and stir before heating and at least once through reheat time and again at the end.
Techniques for Preparation

Covering
Covering food minimizes the microwave cooking time. Because microwave cooking is done with time and not direct heat, the rate of evaporation cannot be easily controlled. However, this can be corrected by using different materials to cover dishes. Plastic wrap is the best substitute for a lid as it creates a tighter seal and so it retains more heat and steam. Wax paper and paper towels hold the heat in but not the steam. These materials also prevent splattering. Use a paper towel, wax paper or no cover when steam is not needed for tenderising.

Browning
Meats and poultry, when cooked longer than 10 to 15 minutes, will brown from their own fat. Foods cooked for shorter periods of time can be aided with the help of a browning sauce, worcestershire sauce or soy sauce. Simply brush one of these sauces over meat or poultry before cooking. Baked goods do not need long cooking time and therefore, do not brown. When cakes or cupcakes are iced, no one will notice the visual difference. For cakes or cupcakes, brown sugar can be used in the recipe in place of caster sugar or the surface can be sprinkled with dark spices before baking.

Standing Time
The moisture molecules continue to vibrate in the food when the microwave oven has turned itself off. After all, the molecules were vibrating at 2,450,000,000 times per second during cooking. So cooking continues even after the food is no longer being exposed to the microwaves whether in or outside your microwave oven.

Standing time refers to the time it takes (after the microwave time is completed) to allow the interior of the food to finish cooking. The amount of standing time varies with the size and density of the food. In meat cookery, the internal temperature will rise between 5 °C and 10 °C if allowed to stand covered for ten to fifteen minutes. Casserole and vegetables need shorter standing time, but this time is necessary to allow foods to complete cooking in the centre without overcooking on the edges.

The power level used in microwave cooking also determines the standing time. For example, when using a lower power level the standing time is shorter because of a lower concentration of heat in the food. Foods should always be kept covered while standing in order to retain the heat. If a longer standing time is required (while you cook another food to serve with the first, for instance), cover with aluminum foil.

Converting Your Favourite Conventional Recipes for Microwave Cooking

When adapting conventional recipes for microwave cooking, time are reduced considerably. For example, a chicken which takes 1 hour to cook in a moderate oven will take 15 to 20 minutes on 800 W in your microwave oven.

Use similar microwave recipes to help you adapt conventional recipes. Remember, it is always best to undercook a recipe and then add an extra minute or two to finish it off.

Here are some other tips that may help:
• Reduce liquids in a conventional recipe by one half to two thirds, e.g. 1 cup (250 ml) should be reduced to ¼ cup (125 ml).
• Add more thickening such as flour or cornflour to sauces and gravies if you do not reduce the liquid.
• Reduce seasonings slightly in a recipe where ingredients do not have time to simmer by microwave.
• Do not salt meats, poultry or vegetables before cooking; otherwise, they will toughen and dry out.
• If one ingredient takes longer to cook than the others, pre-cook it in the microwave oven first. Onion, celery and potato are examples.
• When cooking meat or vegetables, omit any oil or fat that would have been used in a conventional recipe for browning.
• Reduce leavening agents for cakes by one quarter and increase liquids by one quarter.
• Biscuits require a stiff dough. Increase flour by about 20 percent. Substitute brown sugar for white sugar and use biscuit recipes that have dark spices or require icing. Because of the short cooking time, biscuits don’t have time to brown. Chill dough for half an hour before baking. This produces a crisper biscuit. Bake biscuits on a glass tray lined with greaseproof paper.
• Since microwaves penetrate foods about two centimetres from the top, bottom and sides, mixtures in round shapes and rings cook more evenly. Corners receive more energy and may overcook.
• Items with a lot of water, such as rice and pasta, cook in about the same time as they would on a conventional stove. (Refer to Rice and Pasta chapter.)

Select recipes that convert easily to microwave cooking such as casserole, stews, baked chicken, fish and vegetable dishes. The results from foods such as grilled meats, cooked souffles or two-crust pies could be less than satisfactory. Never attempt to deep fry in your microwave oven.
Menu Planning for Microwave Cooking

How to Keep Everything Hot at The Same Time

Plan your meals so that the food will not all need last minute cooking or attention at the same time. The special features of microwave cookery make it easy to serve meals with everything piping hot. Cooking of some foods may be interrupted while you start others, without harming the nutritional value or flavour of either.

A recipe which requires standing time can be microwaved first and another food cooked while it stands. Dishes prepared in advance can be reheated briefly before serving.

It does take some experience and time to cook with confidence. Microwaves are fast so you will have to do some experimenting. You might find you will use your conventional range in conjunction with your microwave oven. For example, while cooking the roast in the microwave oven, you can be cooking the vegetables and gravy on the range top. This can also be done the other way around. Prepare your meals as follows.

1. Firstly, cook the most dense item (roast or casseroles). Drain and retain meat juice from joints then cover with foil.
2. Cook the potatoes, rice or pasta.
3. Cover with foil for standing.
4. Cook greens and other vegetables.
5. Cover with foil for standing.
6. Cook the gravy with the retained meat juices, stock and thickening.
7. Carve the roast and serve the vegetables and gravy.

While you are learning to plan meals, you may get a bit behind time. Don’t worry. Dinner servings may be suitably reheated on 800 W, for 1 to 2 minutes per serving.

If you prefer not to use foil, cover food with saucepan lids. A metal lid will retain the heat for at least 15 minutes.

Meanwhile, how can you cook all the vegetables at the same time? Simply place potatoes and pumpkin in one dish and less dense vegetables such as broccoli, cabbage, cauliflower, beans and peas in another. Sprinkle greens with water. Cover with a lid or plastic wrap. Cook on 1000 W for approximately 10 to 15 minutes for a serving for four people. Remember, if you increase the quantity of vegetables, increase the cooking time. Fresh and frozen vegetables can be mixed on a vegetable platter, but remember the latter are not as dense as fresh vegetables, as they have been blanched before freezing.

If vegetables are cut to a similar size, they can be cooked in separate ramekins or small dishes at the same time.

Handy Hints and Tips

• To blanch (1 cup) nuts, place in a pie plate. Cover with hot tap water and heat on 1000 W for 2 to 3 minutes. Rinse in cold water and rub between sheets of paper towel to remove skins.
• To toast coconut, place half a cup on a paper towel, and cook on 1000 W for 1 to 2 minutes, stirring occasionally.
• To make buttered breadcrumbs, combine 1 cup breadcrumbs and 2 tablespoon butter and heat on 1000 W for 1 to 2 minutes, stirring occasionally.
• When heating 100 g baby food, select 1000 W for 15 to 30 seconds, depending on the amount of food or liquid and the starting temperature of it. Test temperature before serving or further heating.
• For an added touch at dinner parties, steam your own hand towels. Saturate in cold water, wring and place on a plate. Heat on 1000 W for 1 to 2 minutes.
• To soften cream cheese or butter, place in oven on 270 W for ½ to 1 minutes per ½ cup.
• Refrigerated cheese (250 g) can be heated to room temperature on 600 W for ½ to 1 minute, depending on size.
• When having a barbecue, partially cook food in the microwave, season and finish cooking on the barbecue.
• To melt chocolate, place 100 g broken chocolate in a 4 cup glass jug and heat on 600 W for 2 to 3 minutes. As chocolate holds its shape after heating, stir and stand before adding extra time to cooking.
• To remove oven odours, combine ½ teaspoon vanilla essence with 1 cup water in a small bowl and heat on 1000 W 4 to 5 minutes. Wipe oven interior with a damp cloth.
• To toast 1 cup almonds place onto a plate and heat on 1000 W for 2 to 3 minutes, stirring every minute.
• To dry herbs, arrange ½ cup of leaves evenly on paper towel. Place a mug of water into the oven next to the herbs and cook on 1000 W for 1 to 3 minutes, or until dry and crumbly. Check herbs frequently as timing may vary with different herbs. Please note that herbs dry and crumble on standing outside the microwave oven.
• To soften dried fruit, place 1 cup of dried fruit into a 2 to 3 cup jug or bowl and heat on 1000 W for 2 to 3 minutes.
• To skin tomatoes, place 1 cup of hot tap water in a 2 to 3 cup jug or bowl and heat on 1000 W for ½ minutes or until boiling. Add 1 tomato and heat for a further 20 to 30 seconds, remove and repeat procedure with remaining tomatoes. The skin will be loosened and easily removed.
• To dry fresh breadcrumbs (1 cup), spread on the base of a plate and heat on 1000 W for 2 to 3 minutes, stirring twice during heating.
Breakfast Basics

**BACON**
Serves: 1 to 2
Ingredients:
2 rashers    bacon
Method:
1. Place rashers between two sheets of paper towel on a dinner plate.
2. Cook on 1000 W for 1½ to 2 minutes.

**BACON AND EGG IN A CUP**
Serves: 1
Ingredients:
2 slices    bacon
1 × 60 g    egg
1 tablespoon    grated cheddar cheese
Method:
1. Place bacon on a dinner plate between 2 sheets of paper towel cook on 1000 W for 40 seconds to 1 minute.
2. Wrap bacon around the inside of a 1-cup ramekin dish. Crack egg into centre of dish and pierce with tooth pick. Cover and cook on 600 W for 50 to 70 seconds. Sprinkle with grated cheese.

**MUESLI**
Makes: 4 cups
Ingredients:
½ cup    honey
2 tablespoon    butter
2 cups    rolled oats
½ cup    unprocessed bran
½ cup    shredded coconut
½ cup    nuts, chopped
½ cup    sunflower seeds
½ cup    dried mixed fruit
Method:
1. Warm honey and butter in a large dish on 1000 W for 1 to 1½ minutes.
2. Add dry ingredients except dried fruit and mix well. Cook on 1000 W for 5 to 6 minutes, stir halfway through cooking.
3. Stir in dried fruit and allow to cool completely before storing in an airtight container.

**CHEESEY HAM OMELETTE**
Serves: 1 to 2
Ingredients:
3    eggs, separated
2 tablespoon    milk
salt and pepper
¼ cup    grated cheese
50 g    ham, cut into strips
40 g    onion, finely sliced
butter for greasing
Method:
1. Beat egg yolks, with milk and salt and pepper in a bowl. In a separate bowl, beat egg whites until soft peaks form. Gently fold egg whites through yolk mixture with cheese, ham and onion.
2. Place onto a well greased dinner plate. Cook on 600 W for 5 to 6 minutes. Stand for 2 minutes before folding in half to serve.

**POACHED EGGS**
Serves: 2
Ingredients:
2 × 60 g    eggs
¼ cup    hot tap water
dash of vinegar
pinch of salt
Method:
1. Place ¼ cup of water, dash of vinegar and pinch of salt into 2 small ramekin dishes or small glass bowls. Cook water on 1000 W for 40 seconds.
2. Break egg into boiling water and with a toothpick pierce egg yolk twice and egg white several times. Cover dish with plastic wrap and cook on 800 W for 40 to 60 seconds.
3. Stand covered for 1 minute before serving.
Note: The size of the egg will alter cooking time.
CAUTION!
Boiled Eggs: Do not boil eggs in your microwave. Raw eggs boiled in their shells can explode and cause serious injury.
SCRAMBLED EGGS
Serves: 2
Ingredients:
2 × 60 g eggs
2 tablespoon milk
pinch salt
Method:
1. In a 1-litre dish, beat eggs lightly with a whisk. Add milk and salt and whisk until well combined.
2. Cover dish with plastic wrap and cook on 800 W for 1 minute.
3. Stir eggs and cook for a further 1 to 1½ minutes. Stand covered for 1 minute before serving.

PORRIDGE
Serves: 1
Ingredients:
¼ cup quick cooking oats
½ cup water
¼ teaspoon salt
Method:
1. Combine all ingredients in a breakfast bowl. Cook on 1000 W for 1 minute, stir, then cook on 600 W for 1 minute.
2. Let stand 1 to 2 minutes before serving. Top as desired with sugar or spices.

HOT LEMON AND HONEY DRINK
Makes: 1
Ingredients:
½ lemon, juiced
1 tablespoon honey
1 cup (250 ml) water
Method:
1. Mix all ingredients in a 2-cup heatproof jug. Cook on 1000 W for 2 to 3 minutes. Stir well.

TEA
Serves: 1
Ingredients:
1 cup (250 ml) tap water
1 tea bag
Method:

Poultry

Directions for Cooking Whole Poultry by Microwave

Cooking
Season as desired, but salt after cooking. Browning sauce (e.g., soy, Worcestershire) mixed with equal parts of butter will enhance the appearance.

Poultry may be stuffed or unstuffed. Tie legs together with cotton string. Place on microwave rack set in a rectangular dish. Place poultry breast-side down: turn over halfway through cooking. Cover with wax paper to prevent splattering.

If the poultry is not cooked enough return it to the oven and cook a few more minutes at the recommended power level.

DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN.
Let stand, covered with foil, 10 to 15 minutes after cooking. Standing time allows the temperature to equalise throughout the food and finishes the cooking process.
If a large amount of juice accumulates in the bottom of the baking dish occasionally drain it. If desired, reserve for making gravy.
Less-tender birds should be cooked in liquid such as soup or broth. Use ¼ cup per 500 g of poultry. Use an oven cooking bag or covered casserole. Select a covered casserole dish deep enough so that bird does not touch the lid.

After cooking, check the internal temperature of the bird with a microwave or conventional meat thermometer, inserted into the thigh muscle. Check temperature in both muscles. The thermometer should not touch bone. If it does, the reading could be inaccurate. A thermometer cannot be accurately inserted into a small bird. To check desired cooking of a small bird, juices should be clear and the drumsticks should readily move up and down.

During cooking it may be necessary to shield legs, wings and the breast bone to prevent overcooking. Wooden toothpicks can be used to hold foil in place.

If an oven cooking bag is used, prepare according to package directions. Do not use wire twist-ties to close bag. Use only nylon tie, a piece of cotton string, or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag.
Multiply the weight of the poultry by the minimum recommended minutes per 500 g. Programme Power and Time.
Directions for Cooking Poultry Pieces by Microwave

Arrange pieces skin-side up, and evenly spread in a shallow dish.

Cover with wax paper, or paper towel. Multiply the weight by the minimum time recommended in the chart.

For best results, select roasts that are uniform in shape. Place meat on a microwave suitable rack in a rectangular dish. Beef rib roast should be placed cut-side down. Other bone-in roasts should be placed fat-side down. Boneless roasts should be placed fat-side up. Halfway through cooking turn roasts.

Meats can be shielded at the beginning of cooking or halfway through cooking. If you wish to shield at the beginning of cooking, remove foil halfway through the cooking time. Beef and pork rib roasts should be shielded by the bones. Foil should extend about 5 cm down from bones. The shank, thin ends of boneless roasts should also be shielded.

Loosely cover baking dish with wax paper or paper towel to prevent splatter. If a large amount of juice accumulates in the bottom of the dish, drain occasionally. If desired, reserve for making gravy. Multiply the weight of the roast by the minimum recommended times per 500 g. Programme Power and Time.

After heating, check temperature using a meat thermometer. The thermometer should not touch bone or fat. If it does, the reading could be inaccurate. Lower temperatures are found in the centre of the roast and in the muscle close to a large bone, such as a pork loin centre rib roast. If the temperatures are low, return meat to the oven and cook a few more minutes at the recommended power level. DO NOT USE A CONVENTIONAL MEAT THERMOMETER IN THE MICROWAVE OVEN. Let stand, covered with foil, 10 to 15 minutes. During standing time the internal temperature equalises and the temperature rises 5 °C to 10 °C.

Half hams should be shielded by wrapping an 8 cm wide strip of foil around the large end of the ham. Secure to the body of the ham with wooden toothpicks. Fold 3 cm over cut surface. For shank ham halves, shield shank bone by cupping it with foil. One third of the way through cooking, remove ham from oven and cut off skin. Turn fat-side up and re shield edges. If desired, glaze last 10 to 20 minutes of cooking.

Canned hams should be shielded on the top cut-edge with a 3 cm strip of foil. Wrap strip of foil around ham and secure to body of ham with wooden toothpicks. Fold 2 cm over cut surface. If desired, glaze last 10 to 20 minutes of cooking.
Directions for Cooking Less-Tender Cuts of Meat by Microwave

Less-tender cuts of meat such as pot roasts should be cooked in liquid. Use ½ to 1 cup of soup, broth, etc per 500 g of meat. Use an oven cooking bag or covered casserole when cooking less-tender cuts of meat. Select a covered casserole deep enough so that the meat does not touch the lid.

If an oven cooking bag is used, prepare the bag according to package directions. Do not use wire or metal twist-ties. Use the nylon tie provided, otherwise, use a piece of cotton string or a strip cut from the open end of the bag. Make six 2 cm slits in top of bag to allow steam to escape.

Multiply the weight of the roast by the minimum recommended minutes per 500 g. Programme Power and Time. Turn meat over halfway through cooking.

Rack of Lamb

Serves: 4
Ingredients:
- 2 racks lamb (approx. 450 g each)
- 2 cloves garlic, cut into slices
- rosemary

Method:
1. Score rack of lamb and insert slices of garlic under skin.
2. Place lamb fat up on metal tray in lower shelf position. Sprinkle with rosemary. Cook on 180 °C for 35 to 40 minutes. Stand for 5 minutes before serving.

Seasoned Roast Lamb

Serves: 4 to 6
Ingredients:
- 1.6 kg lamb leg
- 1 tablespoon seeded mustard
- 1 tablespoon rosemary

Method:
1. Brush lamb with mustard and sprinkle with rosemary.
2. Place lamb on metal tray in middle shelf position. Cook on 180 °C for 90 minutes.

Greek Lamb Stew

Serves: 4
Ingredients:
- 700 g lamb fillet, cut into chunks
- 2 onions, chopped
- 1 red chilli
- 2 cloves garlic, crushed
- 1 sprig rosemary
- 275 ml white wine
- 400 g can chopped tomatoes
- 45 ml sliced black olives
- 100 g linguine, broken into small pieces
- 150 g feta cheese cubed
- 15 g fresh mint chopped

Method:
1. Place the lamb and onion in casserole dish and cover. Place on base of the oven and cook on 600 W for 10 minutes.
2. Split the chilli along its length leaving the top intact, (remove seeds) - this adds flavour to the stew without too much heat.
3. Stir the chilli, garlic, rosemary, wine and tomatoes into the lamb, with the lid on. Cook on 270 W for 40 minutes stirring halfway.
4. Stir in the black olives and linguine and continue to cook on 270 W for a further 15 minutes or until the linguine is cooked.
5. Remove the chilli and rosemary, and discard. Stir in feta cheese and mint before serving.

Lamb Rogan Josh

Ingredients:
- 1 large onion, diced
- 2 cloves garlic, crushed
- 120 g rogan josh curry paste
- 600 g diced lamb
- 400 ml coconut milk
- 250 ml beef stock

Method:
1. Place onion and garlic into a 2-litre microwave-safe casserole dish. Cook on 1000 W for 2 minutes.
2. Stir in curry paste and cook for a further 2 minutes.
3. Add lamb and stir until coated with curry paste. Cook on 1000 W for 4 minutes, stirring halfway through cooking.
4. Pour in coconut milk and stock, stir well and cook on 600 W for 40 minutes, stirring every 10 minutes on 600 W. Serve with basmati rice, pappadums and mango chutney.
**Goulash**

Serves: 4  
**Ingredients:**
- 750 g diced lamb

Directions for Cooking Vegetables by Microwave

**Fresh Vegetables**
Place vegetables in a casserole dish. Add 2 to 3 tablespoon of water per 500 g of vegetables. Add salt to water or add after cooking. Do not place salt directly on vegetables. Cover dish with glass lid or plastic wrap.

Cook on 1000 W according to time recommended in charts. Halfway through cooking, stir, turn vegetables over or rearrange, if required. Vegetables that are to be cooked whole and unpeeled, need to be pierced to allow steam to escape. Place vegetables on a paper towel lined dinner plate. Allow to stand covered according to the time indicated in the charts.

**Frozen Vegetables**
Remove vegetables from package and place in an appropriate sized container. Vegetables frozen in pouch should be placed in a dish and the top pierced. Cook on 1000 W according to directions given in chart. Vegetables should be cooked covered with a lid or plastic wrap.

**Method:**

1. Prepare 20 cm round tin by lining with a double layer of greaseproof paper on the inside and tie a double band of greaseproof paper around the outside. Cream the butter and sugar until pale and fluffy. Add the eggs one at a time, beating well after each addition. Fold in half the flour using a metal spoon, then fold in the rest. Stir in the almonds. Mix in the sherry, and then add the peel, cherries, raisins, currants, nuts, lemon zest, spice and vanilla. Stir in the baking powder. Spoon mixture into the tin and spread evenly, removing all air pockets. Make a small dip in the centre.

2. Preheat oven on Convection 140 °C. Place tin on metal tray in the lower shelf position and cook on Convection 140 °C for 2 hours or until a skewer inserted in the middle comes out clean.

3. Leave cake to cool in tin. When completely cold wrap well in cling film and foil to store until ready to decorate. The cake will keep for several months.

Desserts and Pastries

**CHRISTMAS PUDDING**

Serves: 6 to 8

**Ingredients:**
- 1 cooking apple, peeled and grated
- 1 carrot, peeled and grated
- 1 orange, juice and grated rind
- 400 g mixed dried fruit
- 45 ml brandy
- 15 ml black treacle
- 50 g self-raising flour
- pinch of salt
- 15 ml cocoa
- 5 ml mixed spice
- 3 ml nutmeg
- 100 g shredded suet
- 150 g fresh breadcrumbs
- 50 g mixed peel
- 50 g flaked almonds
- 2 eggs, beaten

**Method:**
1. Place apple and carrot in a large bowl. Place on the base of the oven and cook on 1000 W for 5 minutes. Beat well to make a thick puree.
2. Stir in juice, rind and mixed fruit. Cook on 1000 W for 2 minutes.
4. Stand for 5 minutes. Cook on 1000 W for another 2 to 3 minutes or until just firm.

**NOTE:**
One of the advantages of using your Microwave to make this traditional pudding is that it can be made the week before Christmas and stored in a cool dry place. Do not attempt to make the pudding earlier than this, since the flavour will not improve with keeping, unlike a traditionally steamed pudding.
